Introduction
Beginning

You will have to excuse my life…since my diagnosis for mental illness, life and the lives of lifeforms around me have came to mean ‘encoded aggression’…they didn’t mean that before nor do I plan for them to mean that. From without and within the “encoded aggression” meaning as it is fulfilled, if it can slam hard, grace with grace the encoded patterns, and stand for a symbol of luxury…these things are things it the encoding does.
This intended for those sober and free from the vices of alcohol and tobacco, although such a state of being sober may cost the price of medicine, the price of Science is no object.
Black holes don’t matter. This book is more important than list-it-all astronomy…if the world government figures are going to save themselves from hunger, dental problems and the environment they need this book first and this book is to memorize…the reason for that is recondite but all the same.
The conservation solutions one finds all involve the sort of adaptive memory you are likely to get from note-taking with your Book of Trochia…this sort of meaningful memory is brought about by synthesis and your suggestion of the synthetic in parallel lists. The modern factory is controlled by list-taking, the type you will have if you consult with the Book of Trochia and any other source of literature and start to make a Synthesis List.
The tracking of the modern human, from hand to factory to mouth, and from location to place on Earth where the factory resides, is obvious and maybe even permanent…the travel and travail of the track is clear…the inspiration for the factory came from such a Book as this, in dreams. You can do no wrong by having a handy copy around, to mount your synthesis, refer to the state of World Knowledge, refer to the direct in Dreamtime, refer to the immediate in Powers, refer to the processes in reference to prepositional definition and have a fortune-telling guide for all your Hope and Love.
Between the Ancient Angels and the Forces of First Creation exists a huge gap standing with the divine judgement of many an occasion. This huge gap to understanding, the Now Service Understanding, is there because of huge gaps in our language and the languages of the universe…I do not know what sort of language science you would have to use to find out how the Universe speaks, how it Big Talks, and how things are available from First Roar. At any rate, according to the Now Service Understanding, my writing is available, and in what form, in lists…these cruel lists may seem measly in comparison to your

memory, and you will have to get that proven; they may abominable, but it is just that such details from the Universe can be afforded no less space; they might seem terrifying, but a little mnemonic memorization will ease them…again, day after day, they are to be approached because to this Origination, the Origin of Planet Earth in Intellect, they are the only thing that exists…if you attempt to build upon their definition, it much eases them – they are familiar with being out-written. Ease the rage, memorize. The Now Service Understanding requires that you read this book repeatedly to have it's story ring full bear upon its disguised deep meaning.
The Universe Big Talks the Sva Talat, the Book of Trochia.
The essence of a story that I have tell is that I was beckoned by some angels from some Alien Hell (Neptune) in a Dream about Naja-Shaka(emergency) and dreaming can be finally, terminally, the risking of deadly, as concerns Coma(taken here to mean Unconcious, but it is the risk that is the point) and deadly gets the end you just don't want to be in, where the human bodily system shuts down. This Hell was given a diatribe by Demonstrator, a criticism that consistently has protected me from Coma…it was '"the reality of Coma protects biology, zoology, even, from an overt confidence that would be their doom'".
The deep reprogramming game starts with memorizing these words(names) and their definitions(phrases); there is no gainsaying of motor-names, beyond what is gained by the gleaning of this in English(or whatever language it has been translated to) and said, unsaid, by the filtering of it into the Unconciousness, where exist the facilities of the id, rote and the dream-program; the assistance of Ancient Alien Entities familiar to you that dominate Earth to this day are called upon within this book, and made for a guiding method in whichever diverse habits and stable practices are held or gained meanwhile by the reader(practitioner). Motor-names are automatically inclined musculoskeletal and nervous routines.
The use of motor-names in Sleep makes Dreams into the Dreamtime. The Unconcious has a deep gulf between the private and the public belief. The use of a Mindset in the Midbrain is made partial to easy to have by this very Book. Such a mindset helps to study the automatic and constantly, grossly surrendering qualities of sleep, which is practically a facility that turns off and on at any moment. The route of the qualities of the Free and Superior in the Dreamtime are fortunately shared by me. The liberalization of the ancient-most grooves, groves and grunts of Myjik are put to boot and inducted into practice by such a Book, with it's cumulative effect on the ghosts of your region.
The most complex fields of science are held in ramifications of ease in their ennobled study of their placid essence, designated defeating replete essences,

and incorrigibly inspirationally completing problems and the finding of them into solutions is brought about metaphysically. The truth of science is often the same by this Book, being divided into sections concerning what is awake and what is asleep, 161 to 394.5 in proportion of awake to asleep.
What is not held in being awake, is encoded in what are known as these parts of us that are asleep. Now let the sleeping dragon arise, if only by recognition…and have it take these culminating points and play them for what they are when awake.
No universe, be it of a mind, wandering in an explorative fashion, maybe due to obey the laws of recording and proper deposition, is without prize, as some cultures do not recognize. This prize universe is all that exists between this Universe and all of us. It makes you think, Universal Encoding has a lot to do with each of us and our human language, or the language terms we are on. Human beings are too precious not to have a huge book to memorize, and to have all that is earlier known to exist close in on them with promise that will be the way they have enough preciousness.
This book will challenge you immediately with being too fat, so be careful to set it up and set it aside and use every mnemonic tool possible in recording it's insides, for after all that it is just a collection of lists that I am confronted with. Being the consumptive collection of lists that have to show the cumulative deification and play of sleep, awakening and binding of the Least Bang, of eight billion years after the Big Bang, but filled with elements of the God-Spirits of the formation of the binding of Earth, as it's inner seam, the glue of the spine of the Book of Creation.
The deity, whichever one that is, and I will have plurality swallow me in that, no matter how fallow is the fact, and light – sounding the words to wear(they are so weak they get a peak of strength), if duality would do that doublespeak- would have the comprehensibility that words and definitions bring to them..them to… whichever way it is.
First, find your imp. Since this book turns over at the FFC section, where '"they'"start working on your awakening, or awareness, perhaps it is best you leaf down to past 789 definitions and start to read the FFC. Go beyond that, beyond the twin Gods of Affixation, (interject here: if this gets boring, maybe a scheme of paradise of design of Similar Count would help to raise the reward system, so I will include one at the end of this statement; it is by combining all definitions of God in this book with the Gurgles of Wisdom by the Ancient-most Angels that this will be found), beyond the Beings and the Judges, Wurgonna and Amalamachagra, to a section with the 60 angels and demons of Earth, and therefore find your imp from around 60 of these. It doesn't matter which one, not

at first; but this is simply to test recognition. Be sure and take this for real and then you should have no problem testing your memory.

Can you believe this happened…an angel tied me in with a promise, and bound me to the laws of Neptune, whose real danger is double-meaning, yes, this means you, and other laws of the simply obvious against the immature, of Angels, in the name of the Planet Neptune
I pray to thee, oh Demonstrator, Angel who has bound me in, to gainsay current convolution, with what had played price upon product of the gain of innumerable oddities, how dare though so favor mere doodlers
I pray to thee, oh Demonstrator, who writes with me here, what work may be seen as merely fictive to insiders, how does thy fascination so unveil a promise to the doomed and shining, I would have thee bring it on
I pray to thee, O reader, in the name of Demonstrator, insect-ghost who appalls All, please leave the Sacredness to my angelically coursed soul and free for yourself in any way you may magnificently make it possible, free for yourself, free for yourself these notations which follow
O myth of angels pure and past unsullied and extant, I have through naja-shaka a remove of ye all from the distant and have found usual activity to be consistent with your intents and of one who doth not see truth here, know they misrepresents the way it is all going and though they may contend to be demoniacal they are merely bellowing.
Not to make life difficult, this book will be due your dream fusions…
The book will be due to change History, not just have I had experience with Histoire, a Being known to be defined by body memory, but it is due to this the change will come about. The mundaneness around the simplicity of hosting ghosts and the ability to deal with huge egos are both made easy, more easily done, by me writing this book. Thus the capability with hosting past and future in fortune-telling and the ability to extravagantly explore the present, whether through spiritual, immaterial thesis or information in physical means, is put to ease. The reasons for this are recondite and abstruse, though largely occult. It demonstration in factory use waits appeal, and amalamachagra guarantees safe use in the factory.

As narrated by Demonstrator and me, too

Book of 1230 Being-points as God, each one, Mars and noipoin , too
1231 god-names in the Absolute Dualistic sense or participle…or of other

Dualistic senses or participles having within the natural, original kind of satisfying punctuality, reality and principality
This is the Book about The Yggdrasil, The Forces of First Creation, two Scientific Gods, Wurgonna, Amalamachagra, the last two about avatars and avaterms, the Demons Who Dwell Below, and the Gurgles of Angels.
Book of the Lists of 1111 of First Creation
This inside text is guaranteed to bring your bore to breaking, and the research bringing it to peace is painstaking, and the awe of you bringing meditative pause to collapse is where the memory of this book exists and how it overlaps.

This is the listing book.
The listing book is this book; they are one and the same.
The listing turns over, trees, phases, turns into a passage, inclines, aligns, super-combines, attenuates and so forth as the force Nature would have it do so
Originally for this to work it would mean keeping a copy with you at all times, better yet, keep two copies, one that you can spontaneously edit, to get an idea of what feelings and thoughts constitute the process of your memorization.
The entire book works with the memory of God, and you can not be too prepared to do that, so keep many memory aids.
The entire book was told to me by Demonstrator, an Angel you can find at the back end of this book, in the section called Gurgles of Wisdom.
Tell me more, oh Demonstrator, tell me of the vine-tendrils…
These lists are
First Centralizations and yes the small hexagon at the bottom is also a centralization (this is the Yggdrasil, the Tree of All)
Second Formations; includes the Third Arm, which is of the part gravity is in the set of magnetics
Third Group concerning body of God
Fourth Group of two groups gang-sets of Fairness
Fifth SuperGroup or SuperCentralization which formed Earth
Sixth a list of angelic ancient wisdom which helps in awakening
The book proved too expensive to sell and that, while some money may be made off it, is why it is basically free.

The list and listing takes care of the All Around You, a category of satisfaction.
The All Around You is represented by immense and fulfilling sleep, vicarious and fractional awakening, fixation, production or sentiment and wisdom as a sealant.
The expense is in the memorization of the lists, which I am sure they soon prove

worthy, but if you are ethicists you might want to reflect on how safe the Universe has tried to be, and I hope these words will provide a bas-relief to the universe of spiritual Creation.

The listing book Of 1111 count.
The list is one of the elements all of eternity is built of
The partiality with lists is of the diabolical side of angels
The mightiest of dreams is kept in the listing book
the man dreams of the listing book
Err, soul absorbs listing book
what is this book
a book kept in the least big bang that automatically makes lists arise
constituting 33 centralization it is given in simplified form
[yet in that simplified form they have produced lists and these are appendicized to prove a Universal Point the first creator did create the Universe]
The mind of All dreams of the listing book
This is the listing book, the Sva talat, the Book of Trochia.
Oh myth in angels past, count by your soul that I have begun to bring the voices of eternity, and some of their accomplishment, too

This sacred work is to be memorized in part or in whole. Memorizing these lists is good for your mind-brain. The jar of the unused, thus the unusual, will rhyme and syncopate as nature has its' falling. The definition of each is an attempt at wholesomeness. Memorize at least one word.
This will check upon mnemonics, which they basically are.
Mnemonics are the scrapping art of innate dealing, were the most flustered insecurity has its sharp revenge.

Memorizing the whole is probably impossible…though the text comes from the least Big Bang, the Least Bang, as I shall refer to it further, coming in from the Dark Ages, before a Universe existed, and any attempt would be due environmental confusion.
The listing book, Sva talat, the BoT, constitutes, if fully memorized as One Whole, and you pass your test in doing so, an entire Solar Incarnation in the Meta-l of the Star.
The use of mnemonics I think has a sacred place in history, whether it is from rock climbing or the gray grace of reading. There is nothing new about these novel words, I fear. Brave the great distances.

Where to start…you can start by reading the FFC(Forces of First Creation), they are awake…they start in the second section after the count of 789 of the Sleeping Tree of All…and they concern, put in a medically dominant way, each and every aspect of aware life. You can then go on to read of the
Most Plastic God(s)…go and read of the Ancient Angels(at the very end) and then read Wurgonna and Amalamachagra and then go on to browse the Demons that Dwell Below(Earth in Pact-ly form) and the Tree of All…the Book is made for browsing lists upon recognition, and then for memorizing.

Where to start with such a written work…Being a work that puts in a book All of the Gods of this Whole Earth and as such lists are constantly spinning off, birthing as you will have it, and thus it is best you start anywhere, by keeping a list for the defense of your intellectual aggrandizement, or one for your mundane uprightness, or one for your placid, bland appreciation or one for whatever purpose in keeping, I cannot even guess it, but keep a list and maybe even a running compare on its aeffect, so to have for honesty-sake the test of what went by with you.

The truth of such an inevitably curiously overwhelming truth of exercise, belief of exercise or minding of such an exercise is sure to be a mindset for your midbrain and as such necessary exercise, needful exercise and a mnemonic-trip of an exercise.

Train the mind

In which we explore prompting, and withdrawing into friction-like composure, the mind, smooth as oogenesis, and training it to come to Memory around words(names).

Sleep is very serious business, when we repair yourself. Draw yourself up, as serious as you can get, and you still may not be as serious as you can be about sleep. Try with me, to be serious, and remember that it is these small points that constitute sleep. Now look, and you will see a list of seven hundred and eighty nine items, points, indivisibles, that assist in sleep, and know that it is for the details of your freedom, your wealth and your communality to memorize them. The difference between a dream and a nightmare can be drawn to an ever finer compare, and the judgement after they have happened is all that important considering that they are truly up to judgement after the fact and that Sleep is not dreams.

The judgement, yes, judgement, that is all we have time for with our immense

Egos, the judgement between dreams and nightmares is merely clouded by alcohol, tobacco and drugs…not brought to a clear, sincere court that sober judgement would have.
Here is the yggdrasil.:

1.Sakr(of purgatory, whilst one waits on good and evil)numbered list of centralization or mandala of orbs or whatever for lasting heads 1 to 101 copy down this list and memorize it? (planet.. Mars)
The first in a group of sixteen points, expanders, or centralizations concerned with making some one sleep, Sakr 101 is largely concerned with capitalizing on every manner of conformity. What in the name Alla, Athe, is this vast expanse that can only be described by a list, and thus a tree. A centralization it is, and very, very old…and concerned with sleep and giving birth from the Void…it would be the first in the vine-tendrils, a saying for organic chemistry…Asleep. Bass.
The lined-up stars…bees

2.Nakr(96 the exercise question) from 102 to 197-mars copy down this list and memorize it?
The second in a group of sixteen points, expanders and centralizations, Nakr 96 is largely concerned with the externalized differences in stillness and the waiting…reaction or resistance to sleeping.
The color of stars…fortune-telling is cast as possible from it's dark and immediately interpretative veneer. Asleep. Base drum, gong, bell gong, tympanum… Wasps.

3.Detakr88 from 198 to 285 -mars{red star} copy down this list and memorize it?
The third in a group of sixteen points, expanders or centralizations, Detakr 88 is largely concerned with the resistance of the unconscious. Asleep. Drum, simple-that's to drum on.
Whilst contemplating…much can happen when you catch the hypnotic skip in being brought to sleep. Hornets

4.Diorakr76 from that to 361 earthly copy down this list and memorize it? The fourth in a group of points, expanders or centralizations, Diorakr 76 is largely a sacred sameness that will live on no matter how changing the newness of life gets or is. Asleep. Drum, cymbal, piano or bells.
Sciences abound…sweat bees

5:Starapakr64 from that to 425 [_Venus copy down this list and memorize it ?
The fifth in this set of points if conceptually thought of that way, expanders(list), or centralizations, this one is a concentration or a test. Asleep. Flute.
Defines life to the level of the same multiplicity. Stick insects.

6:Kwordakr52 from that to 477 _Venus copy down this list and memorize it?
This sixth one, whatever one you call that, you sure does have to start at one, sounds like somebody building something. Asleep. Lyre.
Real time. Leaf bugs.

7:Kyodakr48 from that to 525 _venus copy down this list and memorize it? This seventh one, point, rampart or ramification, reminds one that someone might have been making a list of a list. Asleep.
Organization, of life and in life of inheritance and transfer-scales. Violin. Beetle.

8:Richakr44 from that to 569 _venus copy down this list and memorize it? This eighth one, of whatever ones are, seems like the play-acting for a vehicle. Asleep. Viola.
Count of the stars. Scales.

9:Latepakr40 from that to 609 _venus{green star}]copy down this list and memorize it? This ninth one, centralization, is the harsh outline of virtual lullabies. Asleep. Recorder.
The coming about of dreams. Aphid.

10:Kilapakr38 from that to 647 _mercury copy down this list and memorize it?
This tenth one, centralization, seems to be about hastening away the darkness or preferable gloom. Asleep. Clarinet.
Punishment is an option to all things, not like stretching but a gathering of sorts. Ants.

11.Kourseakr36 from that to 683 mercury copy down this list and memorize it?
This eleventh one, point or centralization, seems to be about holding one’s stead or balance in sleeping. Asleep. Saxophone.
The memory of all dreams, addition to a stellar load.gnats

12.Owlchalkr34 from that to 717 mercury copy down this list and memorize it?
This twelfth one or centralization is about seemingly learning in the trance state. Asleep. Trumpet. Bottlefly.
The memory of all learning...

13.Chalkr28 from that to 745 _mercury(orange star)copy down this list and memorize it? The thirteenth one, point, centralization, conspiracy, or whatever it is, seems to be about holding language in the sleep. Asleep. French horn.housefly.
The memory of all exercises.

14.Raschalkr24 from that to 769 sun copy down this list and memorize it? The fourteenth one, or conspiracy, is apparently about the keeping of trees off lists, or maybe it is a personal space indicator. Asleep. Trombone.butterfly.
All of these excess physical memories cause stars

15.Rasapechalkr14 from that to 783 –(sun) copy- down this list and memorize it? This one is seemingly about the working space, or the keeping of activity. Asleep. Triangle.
The Precisetor, First Creator of the Universe.termites

16:Fatakr6 from that to 789 sun copy down this list and memorize it? This one is about the recovery on sleep, I think. A hexagon. Though it is deeply in sleep, so there is no derision of shadow. Asleep.
the end of the tree of all... Wind chime.anthill ants.

(we interrupt to find vital in the interest understanding and or interpretation that an orb is not a force, a force is something that affects something, a reaction or a will that can be measured; an orb is a settled piece of nothing, but a force becoming memorifically raised in the body of a reproducing robot is a sense, and a memory is the scraping of an orb to move...but a judgment is neither force or memory but a braking of an orb to stop or select or connect or conjure out the mnemonics at a point in time and a pace or place in space...) But does it have logic in it, a point we will get to later. The logic is precisely that with all the work involved in the memorization of something, there is that much force, and it is force toward the Subject, as well as that much Judgment, made from the use of rote with the material aids for the precise physical balancing and calculating leniency of Rote that is possible as force away from the Subject, as well as to and fro and at diagonals with the use of material aids in space, to be very precise. This wear is considerable in nutritional value and is the labour of an individual, and in hot weather may cause the individual to sweat more effectively in a fixed position, for one particular example…doesn’t matter, their sweating happens to bring about cooling, unlike some Products.
This book could be said to be the reprogramming of your universe.

The Book wanders on, with loose displacement as to it's keeping, being a fashion of descriptions and lists, being mainly about the metaphysical Creation of Earth. The recognition of it is at a Supreme level, though, I sometimes pause for the consumption of Demonstrator.

Endure the Truth

The rapture of the inevitable forces is put forth, and they in memory, are tested, to make sure they remain in memory.

When we awaken, it is the asperity, the harshness if you will, that we have the one hundred and thirty seven forces, wakes or Philosifistatics to confront in your memory, and this memory-confrontation is what awakening and awareness are all about.

I hope that for the best that you will find not too extreme the difference between being awake and being asleep, besides that extreme-ness shall so be more possessed in the case of Dreams.

17.The origin of the Forces and All

The origin of the Forces of First Creation…the very awake and secret Forces lie at the edge of all powerful exercise, endless chatter and sparring halcyon-ness; in them lies the formation of the ego and everything intellectual, as well the trimmings of the seemingly endless formation of the human mind…they are mostly about the business of life and god or gods the lesser and the recorders of all.

The Forces are there, have always been there, have always been in this Universe…at every thought of Extinction, and other Extremes, are still there.

The Seven Forces of First Creation<the pranakl>le xakras789 to 796(stars)---(jupiter)copy down this list and memorize it?? This one is of the familiar chakras. Awake.

18.The 8 FFC 797 to 805 (jupiter)copy down this list and memorize it??This is of the Legs. Awake.

19.The 9 FFC (jupiter)copy down this list and memorize it?? Awake.

This is of the arms and the third arm, in the waking state of the egos' supernally it was said that in one of the formations forming a passage known as god, the juggler is in there, about to remove a projection as His third arm

27.The 18 FFC -- ever see (all) the stars STARS copy down this list and memorize it?? the temple Of the Stars. Awake.

That concludes the Forces of First Creation, or the Wakes they be
Fixate upon God
Formulas for God are put forth, and meditatively memorized to bring about fixation. These fixation(s) bring about the root of satisfying. The memorization of God is largely a thing of the most fraught and strenuous exaggeration of effort, then put by a time of mostly ease, by which time you can safely gain say the mnemonic therefore bringing about memorization-ease.
28.God the First13 outside the stars copy down this list and memorize it ???God the Authority, the Imposer. Awake and awesomely replete.
29.God the Greatest27 0utside the stars copy down this list and memorize it ??? God the Accepter, the Deuce to Conversation, Fixation of the Ego. Awake and awesomely complete.

Relish Being &
Be ramifying upon judgement

The wisest of all beings are exposed to memory. And the root origins of the satisfying are brought about. In which there is no judge called Fin, or any such monstrous idea of such, and no judgement although it may be Eternal and thus held in Eternity is not, however, final.
& The sweet taste of judgement is brought into parallel. The Court of Eternity is made Naked.
30.Beings and Judges22&22 outside the stars
*Interjection to where heaven is put …copy down this list and memorize it??? Fragile, Potent and Fragmentary for the memory. Creation of the Ego. Awake and at stake.

Contemplate Consequences
The consequences of the greatest demons are put forth, for simple study as to what they amount to. The entire Book of Trochia was taken from a secret encoding espyment in Cerebus and communicated through the help of helpful Angels to my mind, and it will not work for ordinary memory unless you rely upon a listing procedure from reading it to(wards) normal life. I think this Listing Procedure will come naturally. The Terms of Heaven have no more become excess entertainment than they normally have.
31.Demons that Dwell Below 60 Earth Inside Each of Us is special; copy down this list and memorize it??? A diabolical compendium.
There actually three things to the most complex pacts. Awake and stunning.

Indulge in Prayer
Wisdom phrases that assist in prayer are put forth, and hopefully prayer happens. The effort to bring about the Sva Talat, the Book of Trochia, succeeds only with accessories. The book should be memorized by fits of recognition followed by full or partial memorization to aid with the Sleep, and the Awakening in awareness, and of the sobriety. The Book of Trochia is a look at the Grand(est) Government of God…as such, it will do to let the importance of it list, and go on, and use the listing. You shall thus learn to become a Term of Heaven, and your judgement will be held in your tow.
32.Gurgles of Wisdom41 copy down this list and memorize it ?Appellate of the Halcyon. Awake and also awesomely stunningly relevant, religious and relaxing.

So many times sleeping it off and the same aggressive appearance of lists

cleaning the page.

Where are these angels located well let us well get that straight ...they are located at the last point where intelligence is most congruent simultaneous and similar close and curdling on the bodies of human beings and somewhat on birds and seal family, too, on the last point on Universal intelligence and rhythm curdling in their hearts.
The religion of Trochia, Trochianism, is herefore put forth as a proposition…the prescience of listmaking as its' active beginning, staring as a start, copying and rewriting as a module of the final ideal, which is ritual.
What ide of maturity so seeps hereinafter but the idea of a tower of babylonian prospect of the respect of the maturation of these human beings…with that respect so planted so as to give this massive Abstract so of Eternal Law.
We approach a Ruthless Lot of Gateway Drugs (a saying for bodily chemicals), Precocious Liabilities and Sudden Adventure Pattern Platforms in the Laboratory of the Harsh Future and out of which of thus should come the Abstract so of Eternal Law such as if to even Internally approach the Abstract of Eternal Law's Creation in the Void.
We first start This Mythology so harsh as to endure the harshness of Science, this mythology most grasping, searching and culminating insofar as to search out the places in Abstract whereas the Mind Bends, and the Inkling of imagining gravitates towards eternity and the Concept catches the Word. As an earlier ancestor of man was called "Purgatorius", a squirrel, so do we take out two Centralizations of purgatory, one of 101 and one of 96.:
First let's get it straight, there was this massive thing, made of memories, all 789, to give a precise count, or a rough cut-out, all memorized by an object between, beneath and participle to the memorization of all 789 rough-count memories, and there was in front of it a great stellar mass and it, over a period of just the most philosophical long time now known only as the most philosophical long memory, collapsed into the stellar mass, and fought hard for it's memory, a set of 789 rough count memories is the same memory, and maintained this tree of all in the stellar mass, throughout it's exploding into stars or unpeeling if you would so have it, I am not sure that space conditions allowed for, or maybe they were material conditions, to insert it in the middle of the continuum, that made for this unpeeling, or chafing, into the smaller stars we know them today as, or we did know them before they became white dwarves. This 'thing' was/is the Tree of All.
In these same Space positions where time equals space and the Big Bang existent with only memory and rote attending, no minds, the First Creator of the

Universe gets no mind, having run out of His, Its', or better yet hers. Having got no mind, he invents a Sakr 101, having got to gauge the memory and the rote got to a gun. With the gun he first makes matter, and having shot this at the stellar mass, it makes that expand and this bloats, and blows up into the Universe. The gun is made of rote and no mind(s), but bodies, and its origin is still unexplainable, but maybe is the first originating mind. In this same Space position where I can say there are finer minds, they had mighty fine minds, back then, made of pleasure and pain, loud with the roar of extraneities, being propositions, and false becomings.

In Sakr He found the incorporation of lists such as they made trees(and vines, or tendrils of two, deuced tendrils)and these trees collided with each other and formed passages…well, the tendrils collided with each other, and formed life, or Primeval Nature. Here, the First Creator of the Universe first formed Minds, which were low energy, and they had to be put to sleep by Nakr, an industrial-strength power of trance-creation. Vine-tendrils is meant to mean dualities that so created life.

These Minds were of the first formation of beings and wakes, demons and angels, authorities and subatomic computers. They learned to study and ramify, decline and bring together inclinations, demand and wait. God only knows what Minds on a low energy source, not connected to fuel, do for entertainment…let us put it this way, they are very patient.

The time with Sakr 101 and with the Wakes(FFC[Forces of First Creation] {numbering 137}) was of the Big Bang(12 1/2nd…billion years ago) and the incarnation of a swimming pool of Sleep and a manifestation of multitudinous Memories and their Mimicries is left pasted upon Stellar Mass…these two groups in this massive treatise of groups were of the time Primeval. Be prepared to Notice that for everybody this is different, and there must be a way to prepare for it, this, these confrontations are of the Unconcious sort that chew at the Roots of your Subconscious…so chose your special secret way, I know it doesn't have to be too large, and confront away.

Sakr 101 plays upon us with urges, as defined, until we sleep, and this goes on for a day or so. Sakr 101 has an opinion and option to everyone it plays upon, and it plays upon them in the period of one day, and with this opportunity to play upon them, it defines however little, and in minuscule differences, things are defined, so from a broad definition, as I have laid out here, to the most exact and peculiar deference, it plays out a surround to sleep, thus creating dreams. Sakr 101, and the remaining 688 items of the Tree of All, all create dreams.

Like if I put it all together with all the FFC, and gather all my clarity to my Memory 137, there, I will surely be put to finding a Sakr 101 chewing it's Way

into making me sleep, again. Perhaps, the duty of the Tree of All is to strengthen the Memory Position of the Incarnation.
Sakr 101 is the one oh one ways of filing the same thing, need to get a little sleep.
OK so here we go:

We launch upon the listing book.

The first section is the Tree of All. In this section there are listings, decreasing in size, that all have to do with points that make us sleep…this continues out to 789.

The super-combo Sakr is put forth, spewed out, arranged in this list.
Each one to another one, piled through and worn upon each other until they much as make river pebbles.

Chapter One

1.abod
Abod-
body of all, ritual, manner, method of appeal
2.absu-open w/out the mind in unbelief
3.ache-opening from w/in the mind
4.agog-balanced fixation of violence
5.ajax-boldness
6.anta-the stacked up, the piled down
7.argo-the inside as guidance
8.aria-backing out
9.athe-exertion, alla literally
10. atom-smallest part in mind
11.aura-the surrounding and the least
12. baal-failure
13. baba-the cure perfect
14. beta-test
15. bast-secrecy
16. buda-centrality
17. buro-boredom
18. ceta-persistence of individual, seal
19. ceyx-eliminative destruction
20. chur-mixing up of things

21. coma-unconcious
22. deva-the softest power over all
23. deka (dela)-slowing of things
24. dike-any force that is extreme
25. echo(aeon)reflection of integrity
26. etka-sympathy and causation outlined
27. erek-need for fulfillment, falo
28. enki-arcane
29. fera-salvation from the stars
30. gadi-passage-machine
31. gini-intricate pursued by discipline
32. gost-that wildly reminiscent atmosphere
33. gibl-loss but not failure
34. gnad-parts just small enough to handle
35. hebe-service, slava
36. hera-respect withdrawn to make righteousness
37. hydi-the hidden
38. hygi-cleanliness
39. iota-little details around the unexpected occur as a solution
40. iona-grace
41. ikon-the shape as symbolic
42. inoi-the annoying
43. iris-sensation
44.isis-rebirth
45.jala-wish of other,nulla
46.kali extreme violence
47. khem-chemistry
49. krux-pressure/sacrifice
50.lala the care less
51. lalo-the almighty as greater than itself
52. lama-the search is in the doing
53. leda-leadership
54. lgol-presumption as the greatest, agol
55.loki-pain
56.lola-relaxation
57. luna-mystery
58. lyra-appreciation of defined tension
59. maia-lowliness of time
60.mare-dare and the fear

61. marm-unentangling undefined
62. math-mathematics
63. mira-reflection miror
64. mizr-mystery as intricate art
65. nike-speed
66.nixi-reticulations
67. ogre-odd against event
68. ogle-witness
69. odin-sensory load
70. onus-cleaning by confronting the undefined
71. ordo-order
72. ovus-ordinary as most fascinating, egg, oegus
73.oola-salvation as science itself
74.pavo(semi)-the splitting up as a power over all
75.puba-surprise of the fruitful
76.puda-skill in the insouciant
77. pixi-delicacy is one half-magic
78. ptah-failure only in death
79. rada-star chemistry
80. rhea-waste
81. runa-the symbol as perfect, syna
82. styx-the piled up dead, the first before Kuma
83. sudo-the false, poly
84. sybl-the asexual personality
85. tera-dominance in authority
86.tini-the tiniest in thea-touch
87.tole-measurement as perfection
88.urus-self-hypnosis
89.vada-space as a harsh study
90. ruda-the crude as perfect ryda
91. vise- the holder and symbol for wisdom
92. vega -the vague
93. Vudu black majik
94. thor-thunder force
95. voiz-the capacity to assert oneself
96. ovid-evidence
97.zeus-great guise of refreshment
98. naja-linear qualities
99. iola-movement iona, ioma, ooza

100. gaia-greater
101. cepe-persistence of individual
48.kore-needful violence

1 Abod in the all of everything we have this one who doesn't need support to get to the details of working psyche, as we will say our adage for spirit is; the point of habits, habituate, habitual, habitat
2 absu this opening helps this one detect personality in the person, likeness in the entity, and type in the incarnation; the point of expansion
3 ache probably good at water-memory; the point of cores..opening from inside..the…mind
4 agog it is in this balanced fixation of violence that a new protocol is made; belial, gibil of the biblical, Kali no longer interrupts with "'get it all out of yourself'"; instead now a gathering or incarnation is put to work on whether it is a gathering or incarnation and the entity is able to plan for the future; point, loss of temper
5 Ajax this helps in dreams as well as reality; the point of boldness is Bravado
6point of the packed anta the piled up the stacked up the crushed and the smashed
7point of instinct argo the inside as guidance
8point of reverse travel aria the backing out
9the point of whelm athe
10the point of minute atom definitely something that could fit in a subatomic computer and yet be invisible
11the point of vague and vaguer aura
12the point of fails Baal failure
13the point of infant Baba the cure perfect
14the point of test beta
15 bast secrecy the point here with me and Demonstrator and maybe His small army of ancient angels is the point is unknown or Figuring go out the files
16 point in center buda
17the point becomes boring buro oh what is the meaning of boring perhaps it is Mr. Archibald's book of 1231 names that are words that are definitions perhaps perhaps it is also that God put something that is boring deliberately like 1111 sections just so more painful ideas would retreat from the act of memory well we'll go get a good bore on and read this and see what turns out, go slowly about it to see what slowly gains instant recognizance and other such fashionable ideas of speed memory, to see if there are little grains of speed memeri
18 ceta persistence of individual becoming the point of self-rebirth

19 ceyx point apocalypse
20 the spirit entity, gathering or incarnation keeps this point uninformed this is Chur innate of the nature of Sleep and from the earlier Subatomic computer Systema
21 coma no matter if dreaming continues, it usually ends up here; the point dominant
22 deva the concerns of a deity or the point of the detracted
23 deka(dela) the slowing of things and the point being detracted
24 dike any point that is extreme and the cracked things is this is usually disassociated and misallocated with mental illness by a smooth yet naïve business-like philosophy
25echo(aeon) reflection of integrity with the point of contracted respect fifth in importance of the sense
26 Etka sympathy and causation outlined or combined or whatever and this is with whatever point of soft and helping the sixth in importance of sense
27 erek we have here positioning of memory or it's mnemonics, as you can consider it, stick with me, o, Creature, for memory is considered awareness, no matter how dreaming, and mnemonics the aid to memory; basically the incarnations, they tend to place up their memory with the point urge
28 enki the point hidden in the arcane
29 fera Actualizing the metallic in incarnations the point of the Stars
30 gadi the passage machine everything you do is recorded and I am recorded too in the Tree of All and the point is reading and writing
31 gini the intricate pursued by discipline the point complex
32 gost memory is a phase in the eternal and here we have the maker and recorder of incarnations, the keeper of spirits and the seventh in importance of sense with midbrain sense of friction the point supremely as no point
33 gibl the point ailing, for the fragile and exteriorized in recovery, repair and restitution during sleeping or kept in an Unconcious format – the Unconcious is suspected to be kept with one during every waking moment
34 gnad parts just about the size of handling the point handy
35hebe the point entrusted will go on and be used as One in the Gathering Incarnation Entity
3 hera the point respected, the point divined as all enthralled with respect to keep one side of sleep, and dreams, well, motor function, awake
3 hydi the point disappeared like it was never even there
3 hygi the point cleaning
3 iota the point immaculate
40 iona the point connecting

41 ikon the point suave
42 inoi the point agitating, all with every annoyance, lifted in one small ball, point or packet, away
43 iris the fourth in importance of the sense
44 isis first in importance by which we mean regain, success over the replete in essence, re-establishment, re-affirmation, re-use, original-cleansing, refrying of those vibes, retrying of the Iso-essence of the grave and heavy, tuning of the forks of horns, re-standing of the essence in the prevaricating wind of extinction, re-modulating the terms of dependence, basically Isis is a thing of Lorelei to humans, being too busy to bother with company because it is dealing constantly with dependency
45jala the point jealousy of others
46kali the point necessary violence
47khem the point is chemical not mystical or mythical having more to do with why rocks get born on Earth than anything else
48 kore more the most needful violence is put to accent
49krux the point held down
5 lala the point the care less
51lalo the point overcoming
5. Lama the point in looking
5leda the point to follow
54 lgol the second in importance and one of pronouncement or dictum, maxim, precept, order, dictate, decree, command, edict, saying, ordinance, affirmation, all of these and more are kept in the pronouncement, declaration or statement of lgol(algol)
5loki the point painful apparently this is how people sleep they start a count make it a multiple subtract in the multitude the multitasking pain
5 Lola relaxation
57 Luna mystery being the point to engage in, super-file and continue mystery
5 Lyra appreciation of defined intensity, blockage and tension this is how people sleep they cause a subtractor among bound up muscles and pile it underneath the the multitudes of the memory of the Dead and Remaining
5 Maia to no approval of Agog or of a Gog, the lowliness and lowly essence of time is spelt the point Remaining
60 mare surely to every little thing every so often reproduced there comes a challenge and it is all here in mare
61 marm task point
62 math the third in importance specializes in the mathematics of the dormant or inactive or inert universe of the Universe or mathesis or science or inert

presumption of numbers or consideration of calculation, most important in science
63 Mira concerned with point: reproduction
64 mizr point mystery
65 Nike speed point inert unhesitatingly fast occurrences
66 nixi point mark
67 ogre odd against even point is a glimmering of the chances in Heaven
68 ogle the difference between different phases, appendages and cones of witness is studied
69 odin the sensory load is studied and this is spread around
71 ordo point kept to order
70 Onus confront point the undefined and solutions will come for the solving
72ovus the point birth
73oola point saving; is of the Ancient Angels and is a salvation originating ball or point that has all the salvation details built into so that it can save on the most Simple Salvations to the Mostly Mundane Salvations to even, Precious Salvations, by salvaging what falls apart from the universe or environment; dates from the time the subatomic Systema computer exists ten billion years ago
74 pavo the splitting up as most powerful of all … Sakr 101 has 101 powerful points this will probably be One by the time you are gone
75 puba the surprise of the fruitful the point reoccurrence
76 puda the insouciant and skillful point talent
7 pixi delicacy is one half magic the point bearing and being del
78 ptah failure is final and part of the Subatomic Subconscious Subtle Dreamtime, where the dead and disassociated come to life and become of society in dreams, which occurs where Sleep takes place in the Tree of All, and repairs the body from the tearing to pieces erosion and reestablishes the body and energy-electronic-physiological-system so that it can continue to inculcate the Tree of All, as written; Ptah has become synonymous with an alarming recovery from disability
79 rada the stellar power two in Sakr 101 Is concerned with the stark and select studies of Star chemistry This Incarnation ball or point has always been there at least for five billion years
80 Rhea smartest about waste point points pointing to perniciousness are pointless
8 runa the symbol as perfect point-language point
8 ruda the crude as the dawning edge
83 Styx the piled up dead part of the Subatomic Subconscious Subtle Dreamtime
8 sudo the false as having root in truth point reappearing

8 sybl the asexual personality neutered in dreams and eunuchoid in Inspiration of the Incarnation Interest
8 tera dominance in authority point
8 tini(Thea) the tiniest in touch the midbrain has 69 senses
8 tole measure point
89 urus self-hypnosis point
90 vada space as supremely harsh rings of a true quantum mechanical point in physics, all of the space around the Star rings out from the call of creeping, crawling and crud-making erosion seeping into the matter, as different as black is from white, eating away at things; in order to recover from this, we biology need sleep, which repairs and recovers the body, and recycles refuting bits, parts and repetitions
9 vise point recognition point
9 vega Keeping with the naïve cliché on chewing one forms cliques here in the defined of the vague point.
9 vudu black magic magicians' point
9 Thor thunder point
95 void the capacious, imaginable point
96 ovid the evidential point
9 zeus point sleep gives refreshment
9 naja linear qualities accent points and these points combine to make one Sleep in the Tree of All
99 iola movement point has to do with Sleep in the Tree of All
100 gaia greater point
101 cepe warrior point

What have you memorized so far by the mere powers of recognizance?
This list is very long…it has many small pieces…fully one hundred and one.
Remaining count 1010
which is one of 32 centralizations
The list is long and boring, but the listing has to be appreciated for it's common, ungainly and evocative storage of large-scale information…the trip-out into the asperity of the listing leaves one with feelings to be imagined…
The lined-up stars, these that were stars fit together without lens, fit together without eyes, so that they were perfectly in rows, in rows of one, of deuces, of trigrams, of quadrilaterals, of pentagonal nature, of hexagrams, and of seven pointed shapes. These perfect patterns they did constitute until Sakr trembled and made all tremble and then they fell out of [this] space.
This is assumed to have happened in the Big Bang, although many Least Bangs

could also be the place in time where it occurred…we have only to tell the First Creator of the Universe or Whosoever Was There: ‘see, you fell asleep..’…
So, was the Pre-Big Bang Mass an Optic Wonder, and, yes, I take that opinion from Demonstrator as true and further that it was an optic wonder, without eyes, with the optic cords, or merely, with eye spots. It was a patterning wonder that assumed that principle even toward the spineless.
Sakr is the perfect purgatorial zoo of Nature, where all waiting on Heaven and Hell, the risk-takers, is taken. It is one of the purposes of Sakr to re-incarnate, however, that is not how this story turns out, as we shall see. This other purposes of the Tree of All, as yet the Re-Incarnater, is not of the highest mention. It is mainly a Re-Incarnater as the Burgeoneer of Dreams.
Sakr’s help is mainly as a list to be placed around a centralization (in a circle, with lines crossing it at even points, these points providing corners that place a mandala) and read off to help with asperity in the need of sleep.
Sakr is patently a grinder of the intent to memorize, so go slow with the recognition and then you can have it down beat, you can wrap your head around it and you can face up to it’s flayed lacings of ticking flexure.
The echo-sphere is for Respect of intelligence, ecology and Nature…all this will come easy, free and in liberties in Sakr. The centralization of Sakr formed vine-tendrils of the good and evil it dealt with, it formed these in the early Oceans of Earth, hot with lava.
The All Around You is taken care of by the Etka-sphere.
The ecosphere is an overwhelming word…I am not sure Space with it’s grinding Void, can adequately express Erosion, Preservation and the Just Unchanging to a successful intensity…to adequately describe the ongoing, enough, in all these specifics that are needed to.
But how Is that There? It is there by copying and copying, one place to another, copy again, and again, all the time trying the memorization…well, when the rote(engagement) memorizing (and testing out to see if I am right) doesn’t work out, the copying will.
We have only to postulate, the ogle-sphere seems a mighty strange word, that might work out as contemplation-parallax, well, if not that even, then restitution-striving.
Remember to return to this list to hone up technique in glean-picking rote.The denotation of concerns is as peculiar to this lore as the fitting of clothes. To pick is the role of this boke.
Remember to return to this list to hone up on the old creativity. The creative can also actually be touched up from a familiar, suggestive, reparative list. The creative is studied by deities, spectres or entities that are drawn up and drawn

out, and for the drawing in the infamed Book of Trochia.
Remember to return to this list to indulge the Imagination.The Unconcious is indulged from this one source, an idea unique to this manuscript, and the Ego and how many of these that are ego death are satisfied by the First Creation. The Unconcious is a huge free filing system that may be very hard to clue/cue but which is a file repository for the humbling Origin, by which I mean a Life, or the Ache-term of it, and the First Creation, by which I mean this of larger ramifications suggestive outside the Life, or the Absu-term of it, by which I mean the finding of these reference points outside the mind.
Remember to return to this list for dream interpretation. The random, sky-torn, rambunctious and rambling fields of dreams are provided good mapping and goal setting by the First Creation Names.
Remember to return to this list to fantasize. I am not sure of how much the pleasant is elicited by the First Creation and it's Hard to Grasp Names. Your mind becomes fantasy and wreathes a welcoming pattern of solutions with simple original cue/clues such as Agoga and Behemoth.
Remember to return, for life science, to this list. The use of a familiar Name by which a list is kept to imagine the depth of definition, for instance this God or the Devil, is pact and participle patent to the Book of Trochia. A familiar Name, with all parts descriptive, just may do it for cue/clue of trigger.
Remember to return, for "life parallels", to this list, by which I quoth Demonstrator, 'life parallels' are these things which form the outer branching of the net contemplation. Life science does have a blooming and descriptive encyclopedia mysteriously kept in mysteries such as the Book of Trochia.
The ogle-sphere is a mighty strange word that might work for 'fear not Sakr 101, Sakr 101 may morph you, but Sakr 101 cannot therefore destroy you', a quote that I made despite Demonstrator.
To start down the deuced Unconcious routine for escalating dreams Or escalating Unconciousness we go to this next list and present it as a centralization and so here is two, the backside of purgatory, a list of a centralization that has every form of preventing Chaos from interference with the little sleep in the World, here is Nakr of the second centralization:
A deep, dark, warm Unconcious Sea:: Nakr tells a fortune by first deciding on the extremes…

Chapter Two

102.1.garstrar, gusgi-vision of all the stars in the Universe, comfort not concentrate

1032mastar gopgi-power over close copy, hyendeloik
1043zymurj, gulti changer wrong, once wed
105 4ames - the bad one, fire of imagination, of certain prediction
1065tweymgy-waiting unknown waiting but were. etwpa eymtwa-good to game to stake not take
107 6gamtwa=the one moves doubting held as good as game
1087guza-the end, jewel of the opposite
109 8 forgo - removing exceedings, lightest star in circle of twenty-two
1109tweymyg - waiting unknown length aka eymgay- stake of unknown wait
11110.grimtla argument for life, untold singular virtue, one star, pick one
11211.leltpa life for more, excesses unpaid have to be imagined repeatedly
11312.kalta-truth in abstraction or a clearer means of abstraction than encipherment
11413.spero - line for less, fine line between stars which doesn't interfere with the seeing of either star
11514. altplas- place to put, star as pure suggestion, argument for things such as this manuscript
11615.aryu-argument to win
11716.kosi- concentration, end gift fascination
11817.ovsthla - self-harshness ,thought furnishing
11918..plasa-demand for concentration
12019.stupa- spy for concentration, great silent patience
12120.oblas - obey, come out to not forsake absence of contribution and barren secrecy
12221mblasa obeyance yet fail, star answer
12322emya- trick trend, the fruit the answer
12423optras-comforting fascination, remorseless repetition
12524gunmih-comforting alone, carved out atomic micro-fossil in the echoic
12725psalxi-comforting needed
12826.yopto-need yet rare is the need
12927..koni-need not know
13128.zazen-yet hold lost
13229.tuldrog-yet hold gain, patterning complexity
13330. dulyab-yet hold to verb, fight to ease
13431donitch-resort to repair
13532 damya-not obeyance, enthralling, of knowing
13633kara-the cheating of one, stunning
13734kata-position, unfolding
13835kava- staying extra, detailing

13936kama-bade complex, the shining glory certain of kingdom
14037 eymgay stake of wait
14138gultlas wrong the other
14239kana- words small parts, heavy gravity flight
14340spemi-line for small
14441spemir-line for less
14442moba-all to gain. all to sleep on one vast following falling wake
14543mola-all to power, all hypnotic traumatic collapse at once
14644mosa-allness, content waiting
14745mana,mona- the rare left in all, differenced of disturbance
14846moga-all within mass, all fascination
14947garafs-to hold words
15048ova-organ of birth to allow coming
15149omta-the wait inherent
15250onta-wait equals rare knowing, the fragile breathes deposit transparent veils
15351oga-the wait to keep, meditative self-assuredly contemplative most patient relaxed correction
15452agrei-seems to praise but only accepts
15553oegem-a beauty, estimated esteem of freshness borrowed to a singular appeal
15654oemeg-a holding
15755omna-many holding
15856omga-the power estimated in gods(a sharing force) and others' creation, turgor of time and meditation
15957ovthe-happen same place
16058onab-same act
16159alkthra-highest honour
16260onthra-to rise (odd)
16361opze-odd humour
16462guna-know of
16563emblod(mblade)-ringing in bad background, ringing to bring forth the least evidence
.16664gultlas-wrong
16765.arya-arguing to stop
16866urtru-better complex
16967saynloyzj-to hold, whenever, again
17068omend-rise again, stretching out to extremes this word as a holder of by all shadow the light of its strange function

17169tweymo-the need for waiting
17270.jerbo-to have of that patience
17371xyabta-the floating complex to push, dreaming effect
17472oabta-item, list, belongings to work-in-empowerments
17573oapta - the wait, the larger, the vizor in adaption ,clear mood
17674oaptwa - to fail two goods both confidence and proliferation
17775.oaktwu - a failure in terms, operandi
17876spefmurm - seem changing sense, ethera kether kolaps kalkubin
17977.spefge - the line of allowance, coldly realistic sexuality
18078saynly-to go on to any act by no faith
18179goodhars-faith and weakness the failure of comparison
18180.kanroh-notice of cipher, somnabulastic interpretation
18281.ardos-loss of memory, nothing more
18382arjib-memory hunger, type casters' false parade, more power, more, more
18483kaltgyai-truth thrown, throne, truth versus logic needed in bearing of hearing of this truth or adhering to it
18584oaga-any edge
18685oaja-the fastest line repeats theme of edge by abstraction
18786onthe-accuracy of words in say\spell-ing
18887saturzj- the knowing more of awe, cleaned
18988garaj- place to put lag
19089obspe-life to line, connection between stars perfect round world
19190obswa- safety in existing
19291kuma-the bidden, they pile up under kuma
19392komna call for without getting least-ness yet
19493ogult -hidden
19594omtlag- could be had
19695opthoth argument for deem
19796mastha- getting to a hereness an acceptance in thereness

1.nakr is unencumbered in sleep, free to lift '"you'" away
2.nakr is prepared sensitive to each littlest state of awareness, prepared to lift a copying
3.nakr has steps to every forbearance
4.nakr leads the way toward fears
5.nakr inspires in that it is bristling in patience
6.nakr moves doubt for false-pronouncement, having preparation for figuring-problems
7.the heavy of the divine seeks limits in awareness, thought and discovery

8.the heavy of the divine removes these unfathomably remote excesses of discovery
9.the heavy of the divine waits like a mirror, to every suggestion, to go ahead and freeze it, or hold it still, so it can be dealt with later, or dealt with now in the motor-name of Coma
10.the heavy of the divine has an immense First Creation argument about the motor-name, and cutting it's nonsense right now
11.the heavy of the divine of this First Creation argument known as Nakr has designs on life, and it's restitutions, recoveries and repentances
12.the heavy of the divine is an ideal invisible remolding barrier between the looser aspects of abstraction and the operation of motor-names, which are things of the divine or sacred of life and it's rote function
13.the unfathomable nakr-eous makes a beeline to plan recovery on the unconcious
14.the unfathomable nakr-eous prepares a secure place within the throes of the Unconcious
15.the unfathomable nakr-eous has aryu, and you will remember that one
16.the unfathomable nakr-eous has a ball of concentration, result of it's cutting the way around motor-names, these excruciatingly intricate and repeatable in sprouting bit-parts for the Unconcious operation of life
17.the unfathomable nakr-eous has all the discipline of the Unconcious promise and premise of the aspersions of One Incarnation
18.the unfathomable nakr-eous has all the traits of One Incarnation, despite how much protesting the reincarnate may be, and any arguing of this other argument it smashes, squishes, slashes into Sleeping
19.this nakr prepares Sleep for to be the greatest adventure, and this is because of repair to the end of Concentrative Abstraction
20.this nakr, 96, gains every cue/clue with the operation of the Unconciousness in Sleep in Listing in the Invisible
21.this nakr, sublime, stands for anything with exception
22.this nakr, divine and sacred, outmaneuvers tricks
23.this nakr, entombed and glorious, outmaneuvers life as we know it(awake) and brings Sleep and Sleeping
24.this Nakr holds comfort by design, and draws it up from whence 'you'(all) are into 'nowhere' and into the invisible where it deals with "you"(sic)
25. Nakr is of the phase entombment of Sleep, so it can go upon Sleeping and deal with the ends, plural and accented of that, of the awake, and deal with the motor-names, from then on out
26. Nakr has the threads of life in Her hands

27. Nakr has dealings with high levels of ignorance from concentrative abstraction and it’s confusion
28. Nakr as you can see deals with the zazen of things
29. Nakr holds complexity in stead
30. Nakr deals with the most active amongst the motor-names
31.this one has many aspects in the recovery and repair of biological species during sleep
32.this one can handle the quirkish and weird and unexpected when it comes to Unconcious wanderings
33.this one can handle every variance from the ordinary in behavior in the Unconciousness
34.this one can handle the position of one during sleep in every diverse and entailed form
35.this one can handle staying over into the consciousness when repairs engaged during sleep must be suspended
36.this one has the pulling off into a bade complex the multitude of motor-names
37.nakr 96 is prepared to wait at bay for registration of the activities Unconcious
38.nakr 96 files up obviated and obvious mistakes
39.nakr 96 makes for the re-piecing of words within motor-names
40.nakr 96 has lines to suspend the sleeping
41.nakr 96 has lines that disappear right there into nowhere
42.nakr 96 gathers things(living beings, collections and gatherings, the abstracted and detracted environment) into huge masses for their Unconciousness
43.the second centralization has extremes of exertion cared for
44.the second centralization has the ramifications of all and everything dealt with
45.the second centralization has the rare, so precious it will be able to bring unique, wearing and personable dreams to each distinct one, every one
46.the second centralization holds all dreams or doings within a mass
47.the second centralization has it to a point to hold all words or the rooting of their secret Unconcious credit
48.the second centralization has it to an organ such that the most facile, if chosen, is recorded as a dream
49.this immense Nakr has the conditional point of certain sorts of waitings
50.this immense Nakr is riddled by holes that minutely and with largesse pump through knowing
51.this immense Nakr records even the waitings
52.this immense Nakr has the most peculiar pretense

53.this immense Nakr is to be eroded by beauty, for beauty and eroded to preserve beauty
54.this immense Nakr is to preserve, no matter what, so it is the most taxing of subatomic ‘computers’, well, if not even that, of subatomic manifestations(which must be differentiated from infestation, rhyming confusion concurred)
55.this unique Nakr has a many holding
56.this unique Nakr has the power estimated in God taken to the plural(gods)
57.this unique Nakr has it that places are taken as familiars
58.this unique Nakr has the same quotient used in the phrase by Lucifer [any act is a fact>>>same act]
59.this unique Nakr has the highest honor (unlike Arora, honor all minds)
60.this unique Nakr causes themes>>things to rise
61.this impenetrable Nakr has an odd humor
62.this impenetrable Nakr casts reputation into knowing
63.this impenetrable Nakr brings about many levels Sleep has left, including a ringing
64.this impenetrable Nakr keeps the wrong
65.this impenetrable Nakr keeps the unique to each group and subgroup
66.this impenetrable Nakr takes what is there, what is evident, what is actual, to form the better complex
67.this immutable Nakr looks for grasp, when it is applied
68.this immutable Nakr has the facility to rise again
69.this immutable Nakr is prepared in the need for waiting
70.this immutable Nakr pumps out all patience in themes>>things
71.this immutable Nakr has of two complexes, or so many, a complexity
72.this immutable Nakr has taken on the mastery over list(s)
73.the extensible Nakr has it that the larger half of everything is the wait
74.the extensible Nakr has it that confidence and proliferation are not Unconcious Instincts
75.the extensible Nakr has it that a failure will succeed, if only in succession
76.the extensible Nakr is such that a whole sense be made of One life
77.the extensible Nakr is such a line for allowance is made of Our Sleep
78.the extensible Nakr has it such that One will try all the chances in Lucifer and His statement
79.the extended Nakr has faith in patience with prayer, in memory, if you read that long
80.the extended Nakr has a notice of the means in memory that pray, or prey, to, or on, patie(nce/nts)
81.the extended Nakr deals with loss of memory

82.the extended Nakr gives a memory hunger as is opposed to Locre
83.the extended Nakr has truth thrown
84.the extended Nakr cuts
85.the extensive Nakr deals with calculating speed
86.the extensive Nakr deals with language, and gestures, and speech
87.the extensive Nakr deal is that knowledge is defeated by awe
88.the extensive Nakr has a delay(Garaj)
89.the extensive Nakr is an extension to Stars
90.the extensive Nakr has a safety allowance
91.informing around Nakr includes there is infamy in and around and about the reference to Nakr
92.information about Nakr concludes is there any call for without
93.informed of Nakr we are on the topic of the hidden
94.Nakr for in prepossessing of in possession or possessing
95.Nakr for in having certain qualities of tools of in has invisible tools
96.Nakr for in locale of in locating or location for to finding of location often in searching area of some tenacity

What have you memorized in this centralization, so far, or must you fight for recognition …?
Remaining count 914.
The truth must be told, where Demonstrator finds me studying how there is an seemingly endless sea of rote-established principles…one of them is this set or family of six…6 of 16…that six can be equated with this six: memory, rote, contemplation, prerogatives, individuation, and, of course, never to be without the ever fulfilling, duplicity… let's consider that group of duplicity to include duality amongst it's definition and the duplicity is just the obsolescence in senescence of duality…the truth must be told that this listing book sprouts lists and this is just one of them…one that would be good for fortune telling… however, suffice it to say that Nakr 96 can be divided by six and then by 2 and 2 and 2 more…I find it exercise procurable to make a set of cards to read a fortune with Nakr.
The Abstract of Eternal Law hereby finds Nakr springs a pile of sprouts of the growths of newnesses and New Eases each to every part no matter how small that part be, and that most lists of being hold this fate in similar telling. So complex is Gost to Nakr that it leaves a grayness of grace.
I am one of the readers that finds the Abstract of Eternal Law interesting or of interest…say, there was such a Law that didst to out-write the Void, and how

would it get it’s start..say, by the way we all sleep..perhaps, these things of Nakr are useful only when we are preparing to sleep..huh, when’s that?.. . ..that seems almost constantly, or every 12 hr.s or so, we are begging to prepare for sleep again…perhaps, life is still only Experimental.
Immense Nakr is a thing where the Unconcious is given the fine-toothed comb of the Nature. This is explainable by Demonstrator, Demonstrator tells me of vine-tendrils in Nakr. These vine-tendrils ended up being something in the Soupy Seas of Earth that were studied and modified through the sleep of ancient Incarnations. These incarnations followed a fashion of following, and slept in the elements: Rock, Sea and Breeze.
The Abstract of Eternal Law and it’s relationship to Space, whereas despite ritual, Abod, it is possible to find things piled up, Anta; this mystery,Grand Mystery One, has it’s aspects…it is possible to suspect what your species is doing…no matter, between many languages, it is possible to lose track, however, to use some words here: ‘the inkling of imagining’ occurs’(“gravitates toward eternity”)and the Concept catches the Word’: it is possible that Word may be Crime, and Extinction…needless and regardless, it is still Void. Switch the picture, if the cause of the loss simply disappears, then it is Gost and Shamanism that must be the pursuit, the activism. No matter, it is still Void and the Void is Space, whereas one has the Harsh Science. Bar law has its limit here, and the law of the Void is its end. Still there must be some Way to write it out, whether it be Tracker Pens or Labtype Writers.
This color, of the stars. This friction or struggle or glitter within the lens is held within tests that reach ideal color while not to injure voidic black. Things are still voidically authentic.
The echo-sphere, and the Etka-sphere, come in from the the All Around You to save you… ..perhaps these points called “God” ea. 1111, 1230, names are points that write-it-all-out in the invisible, the substance of near nothing, the Void, write out what our abundant cookeries of life produce in the Imagination, write-it-all-out so that that premise of Imaginative Excess is temporarily satisfied.. …write-it-all-out on the Dual Poles of God the Greater, write-out the Imaginative Excess on the Unconscious so that the Creature is Imaginatively Satisfied… ..I pray, dear Demonstrator, not to ask too much what this is so.. …it’s count and ruse is clear enough.
But does the BoT have logic in it. Sure it does, we’ll be getting to that.
The echo-sphere is monumentally important in Nature and Space, where Nakr presides, but the Void has it’s Erosion. The word ‘Crime’ is unnecessary to Demonstrator, but we all have our ways, and me too, and we can’t be angels: I would have you get that sensation. Bar law has it’s limits when it comes to

Space, and overpopulation, and saving every life could only be practical with a New Protocol…it shall have for Precocious Liabilities the greater wit of Outwardly Space. This finding of Precocious Liabilities is indulged in the definitions of these lists. The ecosphere is precious, yes, but the word is ungainly in that it's Overwhelming…I, amongst other necropopuli of Urania, have little times for lies, and, with the Overwhelming, things> themes can add up to Lies.
Nakr swings around with many small but diverse arms and strikes away at the Unconcious lumps, hillocks, humps, parings and granules that so occur when a World interferes with the Sleep.

For the logic in the Void, the Stars play an empirical point.

And here is 3 of the centralizations:
or Detakr, at this point I in the name of Demonstrator or in His antigame will not write these names and definitions out with a twixt concerning them…I will instead refer you reader to having made a notebook of 1111 or 1231 spaces to keep a running count of how the names change in mnemonic or memory upon simple recognition.
And I would have you consider it one point.
Though I might have troubled to bring you exact(ing) definition, it is possible that the feeling that this, 197 + 88 =285, might mess with eternal replete essence, as it were. Obviously if you were to consider the full 88 to be One, then it would more or less express the replete essence.
It is exercise procurable to have the complete writ of Detakr seem one point because then it's gradual, growing complexity is put to boot, hits the right live feed points in the Book of Trochia.
It dissolves from this period called activity to a winning count called sleep. It dissolves and re- coalesces from a dangerous point you sleep on, risking much in Coma. The much of gusto and hubris are with, lusting, consumed in the enfeebling breezes of sleep.
The vine-tendrils were passed on to Detakr…Rock, Sea and Breeze became Cipher, Sprite and Sylph.

Whilst contemplating the reflections of various crystals in igneous stones, it occurred to the First Creator of the Universe how much dreams were allowed to exact a loss from perfect systems. He names Tishi-tiu the first angel.
This story, is by my interpretation, of the Book of Trochia, not merely as the Angels Forty-One at the end of this book would have it, a group of lists.
We will take Factory Actualizing to mean the concluding of works in the factory as completed in the beginning, with the designs for the planning left on the product. The use of natural designs is made use of as well as integration of the factory with the environment. The use of Factory Actualizing, that tends to play up on human striving, effort and/or patchwork, in techniques helps with the struggle of Trochia. Factory Actualizing ought to reset Space, at least in Concept. Factory Actualizing is the playing up on what things are made of, techniques and tactics in the art of their Creation, components and processes and instructions in their making, and recycling processes that are going to involve their weight/wait. Factory Actualizing is of great use when used in reference to all of zoology.
Factory Actualizing with the echo-sphere (repeat of Important Rules, Import that they might be) and the Etka-sphere (importance of printing, or manifesting, industrial copies) is, I repeat, important. In the ogle-sphere it is simply obvious.

And 4 Diorakr
The term Self-Expanding Rib Cage can be used for Detakr, as it is exercise procurable…
The consideration of this should be as an expander of the individual > group in their Unconsciousness. This one list of a centralization deals with playing away the personal griefs, facets and formations that prevent sleep.
These griefs, facets and formations could also become Cipher, Sprite and Sylph…Or Sphinx, Circe and Styx, it depends on how you put it…there were

just ‘“word’”s at first, in the opinion of Honorable Demonstrator, put together as concepts, concerns, conceits, perniciousnesses even, that had to be described to keep the life going. A seemingly innumerable number of ‘“Word’”s become the twos and threes of life.

What have you by the simple of recognizance, attained?
Remaining count 750…
Do you have words frantically writing themselves out with their definition?... ..if so, go slower, and what is the purpose of these words now?... ..I suppose I would have to put forth that they're there to assist the Creature in comprehending it's Creation when it is Asleep. Suppose if I asked you to take the Leap to the Asleep, then you would, immediately.
Science is itself a description of terms that can be put in paradoxical manners. This is a matter of Harsh Science, too. Salvation, itself, is usually a coincidence of paradox in science. Clearness of mind, whatever cluttering this means the crawling over from, is the smoothest, wisest gulf of experiments. Clearness of mind is the average state, of the mind operating, and it occurs above the memory laid out for the lifeforms, and above the rote operations.
In Factory Actualizing, the rule is that the Mind must set forth it's rules in the echo-sphere and in the etka-sphere, thus the important rules and the proof in the copy.
Seventy-nine percent of rote is invisible… could this explain hidden matter? Hidden matter is better off being Cipher, Sprite and Sylph for our Precious Salvation…cipher becomes 2 of Prayer(formed as the modulation of acceptance, procept, or mathematical concept, and the reserved reply, acceptance, or inception)…Sprite becomes need for Sleep and Sylph becomes need for Awakeness. This “”music””of the Ancients was abstracted to play, and still is, the twos, twofold, and threes, threefold, of life. Hidden matter is like the precious pendulums of Philosophy and Argument, or Zahweh.
This one, centralization, opens and recluses the lock of prayer that one develops before sleeping.

Defines life in all his lowly robots, and in the most complex of these ones of society, the manifests of the powered orb of definition. The complete treatment of me in this Sacred Book is lowly, but with enough height that I can see that Memory and Rote are not the only two things in the Universe that do exist. The First Creator of the Universe may have had some universe like that. If rote is not a large enough category, then impairment occurs. The time is well nigh to grow

up and realize that category of rote is huge. The term robot meaning here a deadened, therefore rigid body to a pre-animal or pre-machine, plant, factory or stromatolite, presumably manufactured by a subatomic computer.
It is some Universe like some explanation becomes, if anything, a law; and the Language builds on the last to that…that is, if anything happens, usually nothing happens. I, in the name of Demonstrator, call upon you people to memorize these lists…I swear something happens.
Leap from your Sleep, o, Creature, and call upon the sense in the Angelic Assistance.
The 2 of Prayer and the Other 2 continue, here in Kwordakr, part of the formers of life.
More of these personal connections are broken down before Sleeping.
And six Kwordakr:

This is the absorber of Kamakuda into a certaine forme of encoding, having to do with all sorts of association.

What has your memory so come up with, so far?

There has to be an indefatigably imaginary as to what the mind does when presented with a new word(name)and definition for memorizing. Explore it a little, and you will find this aspect of memorizing exciting. All the details of memorizing or checking your definition by recognition can be equal to a graphic, sound file and expandable concept or as one. However, you will have to

watch your Remove, so you don’t start hallucinating.
Remaining count: 634.
These centralizations start to get really finicky about sleep down on the lower part of the tree of all. This one picks over what it is to act slowly, as if affected by the ‘smallest part in mind’. Looks for who is to blame in wet dreams, coursing along.
It is hard to tell about anything when making this writ, because the size of the lists press in with their sleep.
With the tenderness of each word, Kyodakr breaks down upon the victim, hereby bringing sleep.
Makes for real time in each least imagining.
Leap from your Sleep, o, Creature, and call upon Demonstrator to be of assistance in time.
The 2 of Prayer, first Prayer and second Prayer as gainsaid after Sleep reforms it’s position, and the Other 2, continue in Kyodakr. They become Witness of Sensate and Prayer after Sleep, and Embodiment of Witness after Sensate and Embodiment of Prayer after Awakening.

As the words begin In to sleep, what power of recognizance has this left you with?
If that is not the question, o, Creature, what power of recognizance have they(these words) left you in. What sort of thing so makes themes endure?
That is the reason, the answer and the soothing, to cause sleep; but that is not why so many endless questions still are there to ask, still are there to answer and

have your refusal not to wish to know. If it is Absolute Duality you wish for, it is here; you don't have to not know that any more.
The gain of words(names)and their definitions(fructification of appeal) can be astoundingly boring; here again, one must watch your Remove.

Here were sleep becomes like a sandstorm, truth may exist but memory it very little serves. Sleep must be the first emergency in the Universe, universe.
Several times or more the mind is displaced in Richakr.
Count of the stars. These are the measure of all slavery…Universal Freedom.

What clues lie await from this in your memory?
Remaining count: 542.
What makes the clues take as anything more exciting than the words…suppose, they are not exciting, and are both equally as boring..then you must.. ..be.. … asleep. The vine-tendril is one of boring old roads or rows, cast-aside dust or sweat, forgotten, cast-aside memories and old used mnemonics, and this that is fading away, as if deliberately, and delicately fading away…the vine-tendril as I imagine it in Richakr…please forgive me Demonstrator.
Count of dreams. Be false, prepared and the stars are counted, again. We heap the tiring imagining for each exhausting second in the unconcious. The deadening proposition that challenging will bring about raises it’s lethargically overwhelming tact to sleep.

The Average of Suits, a legal entourage to Treatment, gets it’s mention within the pall laid awash by the egg laying of Demonstrator. The Average of Suits averages the way people are treated, when they are, as a checklist of meanings. The Average of Suits gets it’s success in the Treatment of Factory Actualization. The Average of Suits is your best bet to bring this writ to normalcy.
The biological creature, like I am before you, is a thing of the most soft and delicate memory, due to injury like a mass of jelly, so one must watch your Remove, or risked being squished.
The vine-tendrils continue.

The roughnesses of the unconcious are carved back, beside or into the great divide called sleep. Sleep’s big curtains are hooked back with back scratchers, and their cobwebby bulk is pulled aside from the teeth by the teeth of the words endowed.

Proliferation is the right and will be found in everything done, but meditation can be the doing. And that is where Fatakr gets its start. Not much into memorizing, well you may not be, however, you can start here memorizing these six clue/cues to meditation. One must remember these are outside of the human body as well as within it.
That is meditation, not a associative/dissociative spew…not a wandering of balances, but a finding of balances…choice of peace, not dictate of peace…a moment where composure gets it ruling deification…and contemplation will come and hold in behest it's brawny brain-onions…retired as the whole as a moment for extra tranquility and seeing within tranquility what is not sleep.
Meditation is the Brawny Brain-Onion number one, and the Thought-Sphere for the Dead but estimable in memory.
It is the solution for you, o, Creature.

328-6=322. .. …
That concludes the Tree of All, the collection of 789 Spinning, Whirling, Traveling, Unraveling Orbs that causes sleep as a phenomenon. Sakr 101, Nakr 96, Detakr 88, Diorakr 76, Starapakr 64, Kwordakr 52, Kyodakr 48, Richakr 44, Latepakr 40, Kilapakr 38, Kourseakr 36, Owlchalkr 32, Chalkr 28, Raschalkr 24, Rasapechalkr 14, and Fatakr 6 are all of the Orbs in the listing.

They stand for this, alright, but these are only dream states due to the Book of Trochia, the Sva Talat, being for real, the writing that frames, introduces, coerces, inducts and conducts it is only a So-Called Dream.
The Book of Trochia may not work(!) if you don't make some sort of list proceeding from it to (so-called normal) life.
There are vital lists if you are going to memorize them, but they are only secondary. The considerable size of this Tree of All, consisting of 789 words, is enough that it makes everybody in the Universe sleep. Yes, the size of the list, the type of the list, and the location of the list as it concerns you, all of these are important.
The point is too be most discriminating about what is mostly a Dream and what is mainly a Nightmare…prayer and it's obvious, supplication, can do well to draw out most of this.
After we have slept, does the BoT have logic to it? We're going to get to that later on. The BoT (Book of Trochia) may have logic to it, but it is basically a spew whereas Demonstrator handed me down lists, Acclamator accounted for all of it and Examator prepared for this part of the past into future(angelic slang for 'Present'), with the roughness ground up by He into smooth Mind–Bytes.

Next, we start with the Forces of First Creation. Snap to it and awake!...I howl through Demonstrator-ism for you to come to…the Sacred Blessing of a conscious mind with a purpose is to be had. If you count your Blessings, you will not that they are all there.
If problems arise with coming awake, we simply leave awareness to fry away with the force.
Say there is a problem with many awarenesses or awareness essences, we simply

leave it to fry away with the forces.
These are the Forces of First Creation.

These are the same as the day, which by coincidence has it that they invented the Stars, literally. They are of Empires as continues:
They could be put in these categories with those who care less about them and just wish they would go ahead and take care of their usual-ness without having been found out
Various Lists can pull at the lists in the Sva Talat, the Book of Trochia, but these are only lists
7Home and Home Business empire
8External medicine empire
9Internal medicine empire
10Business empire
11Religion, external practices taken notice of, thus the closest one can get to religion is anthropology, practicality practice empire, things I don't want my daughter to learn like freezing your tongue in the winter time or things with lucres appeal a-likened to Neanderthal extinction
12Hunting &Wear activity & franchise empire, zoo and furs
14Farming & Fishing activity & franchise empires, offshore
15Technology, and the technology of excitement empire
16Traditional rites, deja' vu empire, funerary practice
17Politics & Society, media empire>>cultural details
18Astronautics and Solar Sciences, telemetry empire

The vine tendril experience moments of excitement, that is, they wake up.
These are mystical associations of the highest degree...
Vine-tendril makes life.
These forces can be thought of and specialize in these fields:
7punishment originates in force, awareness has ascertained, certain terms it is on the level with reality
8memory is the slave of ambition, memory is 8*17+1 things that seek to confront this level reality is on
9toys, with lists of honor, honor these toys, memory is the balance from ambition,/// because our lives are involved with the Force as intrinsic to our thought
10houses of limits(in detainment), the effort of memory to achieve placement at a waking moment is equal and reducible to it's gain in these 10 houses///with thought intrinsic to these Force

11settlements of language, 11 empires constitute the whole of the Forces of First Creation, the effort of memory holds on///Forces equal 17*2=34*2=68*2=136+1
12dualities in attainment, the dualities proceed one by one to catalog the Universe, the effort of memory is split in two things in meaning///root of 17:
14symbolism in the forces, forced, this of that of a force; symbolism in the overturn; preferences of the Universal in meaning, the effort of memory starts to effect certain able “soul”s, certain gains
15business in the core(in attainment), the ‘“factory’” of forces, effort of memory effects rapture- weight
16stories of certainty, brings tales in the end, rapture-weight brings memory in effort to effect upside-down-ness
17awards in the core(in attainment), brings pricing to having, effort of memory finally effects a price, a slave unit
18worlds in the core(in attainment), brings a theory of a star to light, awareness is released to exposure, experience and/or extensive risk with extremes that may include extinction

All of them empires, of the debris-ridden, of the soap-hidden, of the the intestinal urge to count extinction not extinguishment amongst their means
That’s how I have words for it though Demonstrator scoffs at me

Injected comment against what I am learning is the Law of Demonstrator: Opium must be taken to see the bet of the Forces of First Creation. This is to be taken with a grain of salt. The Predominance of the Law of Demonstrator is don’t preside upon drugs…as well as other things, like pre-emerging emergency unconscious spats and spatters, personality quirks, peoples’ passwords and other such ‘“ trash’”: I quoth Demonstrator. It depends on who we are calling Creature, or Creatures.
All the same, there is little use in the last list as opposed to the lists that I am given. However, as the saying goes, it is all how in you take it, and the listing book tends to sprout lists. It is also true that it is all in how you judge it…and the more, the merrier…it is all piled to gather into a precious force of first creation. I would like to see your lists.

Possibilities can ensue.

We notice various stuff growing here, but it is not yet that FFC have unveiled their “heads”…perhaps it is now that we should mention that they are monumental.

The Forces of First Creation…count them…there 137 Forces of First Creation…they built this World and Universe out of Fusion.
Did they come before or after fusion…it is hard to say considering they are thickly cloaked in caring, humbling, mystery.
I am so sure that every waking hour is spent besides these, about these and around these…not one moment is without these; every waking moment is in parallel to these, diluted and drained with these.

The Forces of First Creation have made all complex worlds to survive with healthy amounts of boredom, so there is plenty of time for the right sort of Judgement…they have contrived to bring about the wayside, the fooler, or the gadget of boredom, the distractive, so to bring about more occurrences, so there is more there to judge. It is their fault this Universe is built of Fusion, and they have worked to bring about astounding boredom to attempt a cure to any of the lameness from the World and Universe built of Fusion. The cure is attempted the same as the opium; an attempted cure, not one for Real. If it was a real one, we would never sleep.
The Forces of First Creation themselves can only be explained at great length, as some things deeply steeped in mysticism and hung up to dry as one hundred and thirty seven mysteries. They back out learning and cause it to boil over, making mnemonic sustenance hashed out of rote and clear out everything left as contemplative discourse. The Forces of First Creation decorate the memory in the attempt to memorize them, and make the use of rote in their case to luxuriate within the esoteric, then pull out the work of rote with asperity. They coat the workings of philosophers. They make powerful ignorance in economics, by what sidereal fashion of comparison, I sort of do know, Demonstrator doesn't know and says it is His job to find out.
Surely, it is in some essence in energies' inhabitation of matter that causes one piece of matter to endure it's time in the Sun much longer than another piece of matter…this alone is the study of the Forces of First Creation…but the memorization of them inhabits an opposite parallel, and that is what these names are for.
Surely, they, the Forces of First Creation, do lie in established points, parallels and parallelograms across the landscape and lying above in the way of the Stars and part of these areas in which they have this purpose which is to establish a simpler inspiration than mnemonics occurs, thereby providing this inspiration so that themes of thought preoccupy the minds and spirits that are there, presumably to get them to become preoccupied with thoughts so this mystery of thought is figured out by something, maybe because they are incapable of

thought, or something like that…actually they are incapable of lower thought but the answer to them originates in Higher Thought.
Being as they are as wakes, these FFC have in them a secret from a Primeval time, when there were merely Minds…they did not have a self…the inclusion of a Soul or Spirit, besides being roughly clinical, is a Thing of Doing that requires an Ego. The self cannot exist with a mind without an ego or egg of animus. The FFC have this invention the Ego, as well as many tactical underpinnings of ramifications for the inhabitation of gas and liquid as well as metals by successive, complementary, cooperating, shun-by-trial-acceptance ordered climates or realms of apparently meaningful energy in matter. This body of life is part and pact pertinent and also patent to the FFC(Forces of First Creation).
This ego has an item of jealousy, an item of admiration, an item of attention and object/subject similarity comparison active no matter how distractive a conversation, and a tension of individual/group comparison; the ego is an incredibly complex thing.
The ramifications are guilty of forming life.
The ramifying and ratifying of nowhere plus matter have produced Life. Life is not Void. This doesn't imply, philosophically, enthusiasm is to be had, because hopelessness can result from all of this.
The ramifying spreads out in an arrangement: The ramifying is done more of in a point in the tree of All, and is done in rows in the FFC, and is done in circularities in Gods, and is done in spiraling circularities in the beings(of Wurgonna) and is done in dual self connecting rows in the judges, and is similar to a great spread out humanlike quality in demons, angels and bio- and bith-sakrologica, the karmas, not the Memories as in the FFC. It is spread out or ramose in God(s), and it is lengthy in angels and demons, thus they can take dependency, and in karmas, rather flat.
To all one hundred and thirty seven, I have decide to divide them in three categories: one, Trochia, a general, initial, more important category, the plural, the one(category) of suspect greatness; two, trochi, category of morals, laws and mathematical principles, pacts, basically; and then, three, troch or trok, theses nervous sensations or other affiliations, impressions, in one word, impacts, meaning imprints or departments, determinants.
If you were planning to have it all, the FFC are the thing to have. If you were planning on seeing things (that bring themes) to their disadvantage, then I guess you were born in the wrong universe…the FFC has none of this kidding about.

.Seven Forces of Creation
<u>Chapter Seventeen</u>

These start the forces of first creation by being bodily points, and one reason for large populations is to spread this Force around. This mechanism, wholly externally, is patent to the Forces of First Creation.
By this mention of First Creation I placate and divert, redirect and channel Demonstrator's energy to the subject of Definition: by definition I mean to describe these Forces or Philosifistatics in a few or more words that ought to be the works for a huge, tumultuous, invisible, mass laying across all areas known as these Forces of First Creation (FFC).
The Forces of First Creation or 137 Philosifistatics are involved in every conversation or even monologue, fighting and vying their way across these for each little attention each one gets…they are just invisible as all get out so they have never been noticed before Demonstrator enslaved me to His guile…they are just part of the 1111th Facts to God now spread across this treatise.
I would have to deny some part of them hasn't been heard of before, but I merely used ancient references to assist along Demonstrator's teaching.
These are the Forces of recurring energy motes, classified by how they do it(Memory, or a wake).
Also defined by me, Demonstrator, as philosifistatics, Mimicries, mimes, wakes or torments or also, recurring energy motes…these 137 awakenings are present in all awake thought, even they sometimes might be present while sleeping. They keep people awake.
The fault of the FFC is altruism , which is selflessness or unselfishness, and not knowing which comes first, every next time, and each next decision-making point, without ever giving it a break, based upon the outstanding reward that will come by 'scientifically'(specifically meaning at a remove) reflecting on their importance.
On the other hand the FFC do not suffer from sanctimoniousness and they form a small world in the mind to defend you as good. The FFC understand that humans have raised animals and have been breeding them to suit their means; here you can get a non-discriminatory opinion from them on your mind, and find out whether someone, not saying who, is using evolutionary means to suit themselves over you.
Like when, you feel you are being nice to people, but don't understand, that is not the way things are wanted.
So here, finally, are the seven forces of First Creation.:

791.

1.Achsa -force of most pure root death –

success anyways kundalini(aka glorolg...distnid)lean into shades of many days Evidence maker. Loosely unconscious. muladhara…is the origin of the Dream Sun
Death by Any Other, not force of relent or force of death…6th force of survival.a sleeping
philosifistatic although phases very, very smoothly to suspended awareness, (awake-ness in mind, yes, awake, but awake has to be held in doubt[of rambling]), held in Zubenubi…Trochia: because genital is too general a category, meaning that they are extensions, like children, generations, the whole realm of belonging tale: always awaiting, first to awakening…first from near-Coma which is sleep; first in details about life which is not so as in dreams, and it has to be compared;
has a quality which makes it easy to admire the spectacular; philosophical sharpness; healthy asperity; has a quality of examination

2Autrua-force of success sacrum
symbol- infinite exploration Helleh, oegeo, support or post-ing Prop-like and very physical.
You are depending(and digesting). Sahasara. A very dependent memory. a sleeping torment...suspended awareness(relatively awake but dorsal)Sun in Intestinal Knot
Trochi. First in gaining upright balance. Rationalizations different than in sleep. Significant seizure of reading imprint. Healthy fortitude. Has a quality of determination. Tale: symbol upon which all things are held

3Ethre-force of necessity, solar plexus
grace-humility aka etidite, aja, facing light of those many days, again…force of success and consequent relaxation. Internal, a rampart of incarnation patterns. Optic centers are around the solar plexus in the brain. Most used mimicry. Manipuri…a sleeping wake, justha pretende, the most humbling aspects occur with this one torment >>of deep awareness. Sun at the Centre of Back
Trochi. First in gaining nutritive content. Survival knowledge intricate nuances different than in sleep. Writing knowledge prevaricates. Healthy health similitude. Has a quality of reserve. Tale: the most comfortable state of awareness.

794.4Dimsid-force of identification as a discipline, heart sign,
nature- the description of a feeling (aka tamat...naamaan...marfnam)the path of your life, also memory of refined excitement…isn’t always accurate since it is

merely associative. The most emerging. A sleeping philosifistatic, which turns like waves in their wind to awareness…most pure form of heightened awareness. Mind you a heart sign is not a heart
Immediately the second most Used mimicry, mime. Sun of Transparent Colour. Sivadsthana..is naymyan. Trok: most detailed memories, very artistic First in gaining awakening as a conceptual sphere. Survival knowledge intricate nuances rawly awake. Writing feedback rings. Wandering asperity. Has a quality of specification. Tale : tale of the heart sign is twice as old as the heart; you can only guess who its talents are, these Incarnations
5Primirp-Force of recovery, throat,
soul-the holding revival of worn spirit Provthorp , closest to Cleaning. Recovering. Anahata…still a sleeping wake, elements of external use- nutrition, cleaning, exercise- are brought to and from peripheral awareness to the Coma state. Trok…impact is a vital part of language deemed to be successful and oncoming Sun of Abstract Means, Abstract Means Sun, Means Abstract Sun. First in gaining heightened awareness and heightened attention. Survival knowledge intricate nuances at full attention. Attendance rings clear to renewed remove. No asperity in the inactive Unconciousness. Has a quality of accenting. Pneum These memories are significant and Primirp is one of the most Significant. Tale: what is not memory, but best expresses it

796...6Oojtroo force of study Umtu third eye
essence-balance of opposites Balance of the ego of sleeping-dreaming and awakening-contemplation Origin of ego A force, wake or Memory of gossip, too, for some strange sidestepping and side-swaying reason. This reasons that reasons are not always what things are so put.
How deadly complex the third eye is, materially, one can not even say…it is simply priceless, and with all that to say, I will simply continue to Isitipraise Demonstrator, at this conjunction. A supraconcious force…originally, a subconscious way. Makes all gears fit together, definitions rest together and facts of importance rise from the slime. You are present in all presentment. Sun of Wire. Vishuuddha…Birther of many memories…a sleeping wake awake as in dreams…functional quality of the midbrain and id are brought to awareness(awake) Trochi…but like formof. First in bringing to full awakening. Survival knowledge intricate nuances at a mathematical compaction in all their complexity. Appointment is a concept. Not very much asperity in the aspiring. Has a quality of impression. Tale: made, an organ that beats the Hell out of every future.

7Puylmup force of freeing from meanings, crown,
finish-vague describing peace/creation in awareness, crystallization of inspiration, Gamag, would make all the rest of the intelligences of the Universe insane by comparison...truly the most arrogant one…origin of free association… keeping bright and alight with this force is hard to do. Off the top of your head, dear reader, Sire or Ma'am. Invisible Sun.
The Unleashed Crown ajnta…breaking up the heading! An awakening, awake wake
Trochia…brain surgery dictates that removing certain parts of the crown removes ability to use memory, so there is a suspect greatness to 'force of freeing from meanings', that has to do with survivors

all balancing, bracing and phrasing up
…Some people have never studied these 7, which originated the Zodiac, and did not see them as fit for their physical demise, but they did just fine despite that. You are to respect this. Introductum corellatum trochia. First in the pomposity of concepts of contemplation. Survival understood clue/cue kingdom strata is freed to the test. Ignore is a concept, or that of the Remove. Light and fine, holds cumuloids above. Has a quality of exaggeration. Tale : origin of the cumulonimbus.
798.
A lifeform is how lowly as a bomb. Not very lowly, for instance, jewel weed is actually beautiful.

18.Eight Forces of Creation
Chapter Eighteen
Vine-tendril makes legs.
8 forces of first creation and collective of everything from humor to tradition :considered the legs :though chakras consider the legs and the genitals to be of the kundalini.
The contemplative is spread far and wide across the ego.

1olpro nuukuun f. Of cuddling,
early Animal description in Primeval Nature, a response in Force. The sheepish one, the 7th force of survival, Throne…has estimation of Death…Sun Pillow..the most distant force or philosifistatic in terms(or opposite) of the tingling or scraping of the nerves… too general so Trochia. First in the bringing about of the capable in concluding grasp. Preferences kept askew. Completion is a concept. Too delicate to get destroyed in concept. Has a quality mostly of endurance.

Tale: the sewage made simply by water erosion needs relief.

799.othro dampmad f. of removal, wake of post-memorization, force of surprise. Sun Soap Solution.
Rather mystically is/was svastike…waiting philosifistatic Trochi. First in higher concepts. Survival understood clue/cue kingdom strata is freed to extinction…settlement is therefore a concept. Highest level of memory, used by First Ghosts of your Species. Has a quality of endurance for endorsement. Tale: in making all things, how do we take them away.

800.irmi, imri f. of insetting,
the comforting alienation; tactic in force…second to ormo, omro, hold of the Fastest Judgement handprint…a real operandi philosifistatic .Puzzle Sun.Trochi. Survival is a sequence of inset servings. Sequel to the memory with no room. Has a quality of fittingness. Tale: maybe it is not a perfect Universe, because for a lot of it, if only in unreason, it ends up here

801.aztutza f.of bewilderment, realignment, insecurity, loose and false association of the most disciplined,
wake of the cough Ahem, awakening force…hooked knot…Dancing Sun. Rather un-originating but may be most real view of memory, that is, a mime of the circumstances it is found and how…when and how…Troch or trok. Survival is Sure of the Past. Sequel to all foretold and before that was sold that falls to the side. Has a quality of rearrangement. Tale: what is animal in intended science and intelligence…

azkekza-force of enlightenment, attachment of a breeze, brilliant
You are heretofore enlightened! …jewels in the chinese eight…refreshing force Unfolding Star.
Trochi. Survival is certain, now that it has reached you. Survival sequel to all that is studied through. Has a high point on the third eye. Has a quality of joy. Tale: what started as forces to make the Universe (FFC) end up giving you this, azkykza

akoka f of following, wake of gesticulation, seeks to make Atom most complex truth of Electron placement, safety force…Sensory Lock-On Star Sun.
Rather miniature …water libation flask…your most famous force!
Survival is guaranteed. Preferences in all directions. Completion at any Stage. Too much of the inception to be a concept. Tracking companion. Has a quality of certainty. Tale: merem is sure of two things, merem and akoka.

Trochi.

mulgum bastsab f of sense through words, particle in nature, like Para, but different
Curious force but second to Para …Pisces, pair of fishes…the rather descriptor. Star Symbols for the Sun. Survival is both of insecurity and of a quality I am calling security. Preferences: tool-using. Completion seemingly never. Took much thought, and it seems that it is true, the word is a part of eternity. Reference companion. Has a quality of the most sure doubt. Tale: sign above the line with ‘“““x”””’and it is a name you mean.
Trochia

mazjram flowrolf f of occult surrounding, wake of arcane accuracy, Mumbo jumbo
Rather militant…lidded bowl..hidden Mysterious Wavelengths Radiating through Wall.
Trok, an impact. Investigators of Coma often use this wake. Preferences unknown. Completion immediately. The device that brings about the sustenance of memory is still a mystery. Has the quality of blockage. Tale: who are we going to call when it is all in doubt, or it is certainly in doubt, or when you are next falling asleep.

1.olpro-right upper leg
2.othro-left upper leg
3.irmi-lower right leg
4.aztutza-lower left leg
5.azkekza-right foot
6.akoka-left foot
7.mulgum-alternate right balance-space on the left heel
8.mazjram-alternate left balance-space on the right heel
settlement to the peaceful enticement to desires, adding terms to content, peace in chatter
Risings, fallings, depth of existence.

<u>Chapter Nineteen</u>
19.Nine Forces of Creation
Vine tendril makes arms.
805.The nine forces, considering the arms.
9and of the arms and the third arm
Reincarnation is the most pretentious religious idea.

806.amta alta force of pleasure, of telekinesis, this glorious force is the wake to Loki, to be awake is to be free, maybe memory, Calliope…of epic poetry… explanation of the philosifistatic is that it is an explanation Trok…tale: memory is by a tale, by the way, of the announcement of Merem, one force of memory, also known as Memeri, of the sixteen FFC, a tale that it is eternal and splits off as one life each, which it can no more but do to continue with that(used)definition in Gost…One Incarnation without that telling a tale. Apollo, actor of the Sun. Investors of how much profit cannot now buy and have nought to do with Amta. For the amtaenth time, preferences are sustainable in comprehension. Twin to punzlup, in that both are yet never satisfied. The device of One Incarnation in reference to revenge over Loki. Has the quality of dancing.

807.almqa almra f. of dismissal, of personal imagination, an abandoning force, can be found in any Mind as dream doubt(111 before last), relaxation continued of the spine causes this, thrown away,
Clio…of history, torment of expulsion, of separation. Sun in Pit. Radicalizing loss brings this about. Preferences of One Incarnation. Often ballasted, worn, teased and torn over torment. The device of one incarnation…Has the quality of suddenly cooling. Tale: they couldn't get '"it together'"so they went on with almlrla
Trok.

ozrorzo-otzozto force of pretense, of psionics, simple force of pretense, acting, Angelic communicant force, antigravity, Erato, of poetry…force of affectation, semblance, ostentation Sun as Short Sequestered Sequence of Jokes. Surety of ignores combined with called-fors is brought about. Humor of One Incarnation. Preferences are elevated. Has the quality of entertaining. Tale: much to do, much is brought about by the little who, so brings about the not refuted
Trochi.

809.4.ishtishti-smartrams f. Of pretense in all and everything, grand,
the force of placation of intent modulation(intent modulation is a character quality a lot like gesticulating but beyond that primarily on the face, wake of the third eye, sharpness of clarifying, speculation and reliance[s] on asperity, all of the meaning of exactly what I mean)
As the force of grandness in league with Robota,; force of the concerned, the reliant, the reserved; Wake of the Worry, most noticeable memory or torment or mimicry, Euterpe of Music..,drawn up into Theatre or Theatrical Obsolescence Troch or trok. Tale is that it found itself(ishtishti) too important and that it tries

to find various humbling or humble ways to play down importance.
Book of Jokes of the Sun(including Sun Media Silence) Not a very sure force. Humor of the First Creator of the Universe. Preferences are nonexistent. Has the quality of life that's entertainment.

avuva alula f. Of fond and unfond gathering, of predicting, preferential force, pollster wake, in nascent sense, Melpomene of tragedy, 2nd dark force Trok, grey as grace of mathematical quality. Most sure that gatherings and animals can be, alleviated in Memory, sort of in fear. Ignore is a conceit. Preferences are kept. Has the quality of victim to one. Tale: and in the Universe, in the darkest force of the animal, we have avuva

amuma amyma anyna f. of valor, of betting, this is a force of glory and gathering, the intellectual deed, the use of Memory can be noticed zoologically here, forgive me, Demonstrator; the specific and described in detail Memory, used-glory, polyhymnia of sacred poetry… .. .,philosifistatic of daring, intrepidness, or determination ..Trok.. Merem's tale is that a large part of the successful universes have to do with betting, and this is the second force of betting after Echidna, Echiche, of the sixteen FFC …tale: no where does it say, but it is implied in this force that there is no strength in systems, only in forces. Gathering of Folks or even forgotten Family in the Sun. Mostly sure of placement. An impact that is reliant on most things impactful. Preferences dependent. Has the quality of challenge.
suprus f. of clarity, of telepathy, primarily a force in History, as concerns History, the imagining of a Good Ideal, transparency, Terpsichore of dance and poetry…, philosifistatic of distinctness, limpidity and articulateness Trok, when you can't be too sure, try to risk. Of transparency Tale: actually guides viruses in what they 'eat'. Stars that are Similar to the Sun with the Sun. Surety is brought to its highest degree. Confidences are floated. Preferences in language. Has the quality of transparency.

suxus f. of honesty, sexes, sectses of projection, a calculating force like Caballero, matrix-like, an unwitting and outwitting mime, Thalia of comic and idle poetry…torment or philosifistatic of integrity, rectitude and decency Trok. Tale: literally, the juggling force of life, evident in the laws about nuclear bombs. Sun Bomb, or Firecracker Bunch. Confidences gain in this. Confidences exchange in this. Preferences outright. Has the quality of eternity.

814.9.burub barab barnab f. of honor, resisting and willpower of teleportation, f. Of the obviating in secondary meanings, actions and reliances, not in secondary

gravities, reactions and personality quirks. The thought-spheres of the Dead boil over…another form of placement, Cleaning, began here, no matter how dirty it is to mess around in Earth(pun intended)…well-used Memories have this, You are Placed upon a Pedestal, Urania of astronomy, wake or mime of respect, dignity, credit, esteem and tribute Trok. Tale: upon millions of oaths, this force rests. Minute Sun. A testing torment. Training takes place similar in for the fact to Ibidini. Preferences of the highest. Has the quality of testing the internal in eternity.

1.the most minute physical force
2.the taker of cares when they cannot be had
3.the most powerful minds challenge held at a estranging stream
4.the usual minding of a second point physical force
5.what is to be had by true science as you knew it((how could you?))
6.the essence of occupation as a force, the first edge to the occult
7.hopelessly clear force
8.a mind body force
9.allah above the body of all in conceit

Chapter Twenty
The randomizing boredom, made still worst by the all-inclusive, constantly interrupting chatter.
20.The Ten Forces of Creation

815.Of clarity, no matter how deep the somnolence, this is the 10 forces…with ten thoughts of reference.
use of tools in mnemonics
10 responses
Ten Forces of Creation
Vine tendril makes the first of the Ego, a part known as the Superego…superego contains nervous response in the ego..

814. Aljta achxta touchout f. of holding, of grasping, of particle-concept-placement, gathered-around, mounting, Sinker in dreams ‘You are in memory holding on to something’. Somewhat taken tongue-in-cheek. Symbol: old man uncomfortable in socially meeting someone...I am god…particle means like, word… Trochia. Tale: just one snip is all it takes, one snap of one thing, for a description to get a placement, for a particularity to get a punctuality…balance in human form Many Armed Sun(seen in Egypt) First of the grasping forces, there is about four of them: mutum, mothom, weldlew and wurbruw and this is

first before them and afinifa. Training from a young One Incarnation, indeed. Preferences of the divine, wisdom and stable, lowly, humble will. Has the quality of disappearing in Dreamtime.

imfri arpfra voltov f. of specific resistance, lightly covering all, very particular force Symbol: word half-erased away ‘You are in memory measuring by “hand” the special resistance of something’. Thou shalt not make a graven image, it might ‘“Absorb’” reality. Of resistive, or of a resilience
Trochia tale: how simply is put electronic current, but eventually it’s secret is memory. Sun Button.
Balance out your picture to price memory with a sound file: it will be equaled in this one. Preferences of greater, consuming stability. Has the quality of interfering with the Dreamtime. God only knows what original complexity this physical force of 137 was dreamt up to control.

oblablo faiscaif f. of knowing, freeing to dream, the Dream originator, opposite of nightmare
‘You are free to know and capacitize your summoning, wandering or contemplations’. You will take no other gods afore me..oblablo is the Common force Symbull:the Dream visage; Of cognizant, deliberate, Trochia. Good for a test of madness. A useless Sun point(guarantee). Most general conception of memory. Training is of the effective essences. Preferences as they come. Has the quality of moving more rapidly with age.

818.4.inmimni omnimno f. of specifying, the Prizing wake, itemizing, detailing, designating, stipulating, ‘You are pulling something out of the particular’. You shalt not take the lord in vain…He is too particular about all His little names. Symbol: many little names; Of predetermining, particularizing, or distinguishing…to indicate Trochi. Sun Spyder Robot. Has a definite turn at detail. Has preferences of identifying. Has the quality of strain. Tale: they all couldn’t figure out/ just one little part, and finally they called Inmimni, who solved it for all.

ororo oltqoqtlo f. in diminishing, perhaps the Creation of Invention, no matter how harsh of striving it had:: Angels praise me for my efforts, a wake is the underside or offset of a force, can constitute grime, rapidly receding images, spook imaginary facades, odd touches and intestinal symptoms…
‘You are dealing with something that is fading away’.remember the sabat day… symbol: faded, erased picture of memory…this philosifistatic is one of the most elegant mentions of memory; through reduction, contraction or mitigating

perhaps the best use of definition in what may fail by oldtkoktdlo is in the wicked curse of loneliness… tale: What do you expect Me(rem) to do about the most vague, the displaced and the traced. There is no other place for this of the nightmarish, and this of dreams. Constant Recovery or Strange Dreams of Wavelengths. The wake consists of thousands of mistakes, missing mights and many of the most mistaken in management. It has for its' respect the more common of the senses, heretofore unnamed in the multiplicity of the count of senses: the disassociated senses. Has the quality of being so common, it affects shadows.
Trochi
malskam f. of comparing knowledge, the chewing mimicry, like in comparing the written word to the act of speech 'You are comparing knowledge or engaging in any complex task'. Thou shall not covet…symbol: the coveted mention of memory Or rather a three-dimensional tree; cross-reference, cross-check Or parallel Tale: many things are made of memory, and one of the more immediate things is malskam, makslam. the 'Sun' Cabinet of Books . Trok . Is as common as furhmruf. Prefers riding on the midbrain. Has the quality of adventure.

murspum f. of freedom inherent, the placid, pervasive and enthusiastic mimicry 'One is studying the freedom innately put'. Honor your father and mother… symbol: s-shaped flag; of exemption innate or independency Tale: the pure essence of memory is, that by any seeming nonsense act, objectives, actions and all sorts of adjuncts are held…Does it have finite integers? I don't know but I doubt it. The Solar Horse. Is to be likened to dream force. Preferences of murspum likened to be grandiose. Likened to will to escape. The details about murspum are often indelicate, it taking too much of a fixed price to deal with them. Has the quality to be the most detailed of the forces merem spawned and He spawned them before the Big Bang of Stellar Matter to put Sakr 101, not Systema, both subatomic computers, to Sleep.
Trok
ibinidi f. of rapid unconcious, ibidini, inibidi, idinibi, however the reversal works out, precarious, the ominous and the foreboding; origin of the Word: mimicry, as opposed to memory, f. Of expectancy f. Of fecundity, one of the repeated imaginary movements 'One is concerned with here the rapidest form of unconciousness'. Thou shalt not murder..symbol: a black tv screen; super- or sub-conscious Tale: There was one thing to beat me Merem, whom always tells these tales, early on, there was a fast force that didn't like dealing with these things that be owned, not just known, and it was ibinidi, idinibi. Trochia. Sun Click. Foreboding, detail missing, and energy is draining; well, often in that

place we have inibidi…Preferences are to stay a wake, pun intended. Has the quality of the inevitable.

823.9.afinifa f. of retaining one grasp element, The Handy One, the framed one, the surreal hand, symbol: a piece of picture, maintaining, withholding, preserving, finger and a thumb, two fingers pinching, a clawing, a pawing, a fin "Hold me back". Thou shalt not steal…withholding or maintained philosifistatic . Tale: associated with the unexposed of matter and plasma, took claim of property when it wasn't exposed to surface sensor or surface sensate; assuming sensate of the universe. Troch or trok. Fingernail, esp. with Sun Design. Is of the order of these things special in that they are specific, contrasts with flathalf most. Has the quality of the hurried.

gooloog f of distinct abstraction, the Selfish and Greedy one; as opposed to Evatom, the economic/eco-logical force, the mimicry- definitely the simplest idea of memory
'"A distinct abstraction is what is concerned with here'". Thou shalt not bear false witness…symbol: a small flowchart, A palpable feeling of the elaboration available ought to possess you in this
philosifistatic Of distinct cogitation, extraction. Might need titled definite abstraction, too…Tale: Merem found in the Imagination he was making the qualities of memory different, and His title of this weird effect was gooloog. The effect stayed around in the background, and continued to compound to where it managed to confound the people who made it. Rhymes, which were not evident until humans began to explore over water in the last two million years, with their liquid, spattering reflection, and preciseness about the liquid, came about, and were framed out in no doubt. A Liquid Expanse Holding the Sun. The gooloog has of the Universe of Memory billions of universes per square foot in some packed locations on Earth. The quality of desperation is had.
Trok

1known near thought to extinction
2opposite inertia

Trochi. is in every way the finest of memories, preferences are in questioning, works by witness in position, has a quality of perspective
If fargraf was the first damnator of set this was the second damnator

Time must be set aside for the Forces of First Creation, and a regimen developed with good mnemonics, in order to memorize these. Reasons for memorizing and the pleasing of oneself must be described and this set aside in order to increase ambition. Some sort of ritual should be devised in order to introduce them to the sleep…Sleep presumably comes from the Tree of All(789 Defined Points at the Beginning of this Treatise). One should be exquisite about the ‘“memory”’, making sure you record any slight differences in recall.
How you have memorized; this should show some personal quality, although, we all know, that is not always possible. Always remember, no matter how little you have done, no amount of praise will be the answer to just that amount…memory is personal and subjective individually to the ego. The ego, duck out when I say this, understands words like these.

They are one-hundred thirty-seven facts as these Philosifistatics or memories, including memeri as memory, so it is quite some tale of handling the delicate in rough circumstances to have memorized all of them.

Chapter Twenty-Three
Dreams are if not one thing, perfect, false.

Chapter Twenty-Five
Making of evolution over ideals.
25. The FFC decided to make rest in the refreshing, and again they did it, and again and again, till the refreshing was as familiar as repeating a thing to get it right, and the two became synonymous, until they slipped out of synonymity, and they slipped back in, and in this slipping back and forth within synonymity of the refreshing and repeating a thing to get it right, that is when they began to deal with unspeakable, and this went on until they were expert at dealing with the unspeakable, and has remained so ever since.
16 acts of grave reliance
Vine tendril makes Ego & Life after Love of Many tales

1 agoga the first one that came about was time, a primeval entity that harbors the greatest impossibility and consists one thing: choice.the theme to the first one, this force, is that it protects all things and all identities and is nearly criminal or felt of as undesirable because this one force created the Universe , so in reaction to its harshness one must come up with a quick plan to the Forces in critical reasoning... telling me tales and as facts telling what we tell as tales to memorize the full truth sequence in order in a sense mnemonically ...in fast lingo is recognizably premnemonic
You dump decisions in the subconscious.Trochia tale: faster than xakfax, force of speed. The impotent sun. Has the virtue of being quick and of equanimity and

is entire, preferences for elaboration and working to fulfill; quality of the supremely necessary.

878.the second one tabatha to mean taggings everyones' mind and as a force it is a fact to space.Tabat, force of spacing. It consists of flatnesses a million times smaller than the atom, that fragment everything. Everything has it’s Memory, and this the destitute or desolate One.
You hold forward to a memory. Trochi tale: can be the most rude and awkward thing, the wake of spacing Paper Sun. Details include that it is a space force, so in this Space Force, questions and answers are explored to bring about Space Memory, a thing of Meta-l Incarnations, such as, i.e., strewn, similar to Water Memory, but the question of Life Originations more important…preferences of the Extended, work of the long-lasting, quality of the extemporaneous.

the third one is Baba-Yaga, a real force of the imagination besides all counts of sensations, sensibilities and belongings…something to naturally get excited about considering all wakeness wears on to sleep. The Primal and Primeval Imagination.
Baygab, force of imagining. The unconcious imagination. Rays.
You depth charge your mind. Trochia. tale: it won’t work to tell tales…you’ll end up waking in your sleep. Ancient-most and equated host to the mind, the wandering, wonderful world of the unconcious imagination includes coursing past the Threat-Coma, to decide amongst the declaring sensations what lies to be said, and preferences include fully sizing up a situation, works to provide the mIdbrain with extra room…quality extraordinarily huge.

880.the fourth one is caballero a supreme identity of an inspiration that made the stars and that is made from the stars. it exists as all higher thought, cabac, force of highest imagining. I called it cabalero because Demonstrator, Acclamator and Examator told me to.
You are making the stars. Troch, trok tale: only equated with the stars because of all 136 others, and they may even consider it, cabac, rather tacky. K(Not) the Sun. Hidden from Stars is about near everyone , everybody and everything, considering only the surface of them and the Sun is all we see…in this hidden realm is kybaklerelkabyk, secret secretion of the Stars, preferences of ostentation, works to enthrall, quality enthralling.

.the fifth one is memeri, as the same thing as memory. As an identity that told tales, created all manner of perfection and interpretation, as the fact it was a quality of the environment, as a fact called awareness. Merem. Memory in

humans, too. The main theme of All these Forces. Number one torment, wake, mimicry, etcetera. Tale of self: the thing is memory is the slave of ambition. You are one with the season memory. Trochia. Green Sun. The main thing and the Origin, as soon as they, He, the First Creator of the Universe, decided this was going on, is this one, one force, one wake, one torment, one mime, one Mimicry; preferences obstreperous, works to assuming root reference, quality one of the charmed.

the sixth one is prometheus, or spearhead so far as they are all good, but then my spirit said the next was maybe not so all good; the next one the sixth one is an identity that prediction, deduction or intuition...also known as promorp...Dark Painting of the Sun(the Aztecs were the last culture to Leave These). To rest upon thought, and in contemplation to examine the root origins of what may come, this is the origin of Promorp, or Prometheus, preferences selecting out of abandonment, working to provide sustenance, quality is of the essence of dark embodiment.
You tell fortunes. The 1st dark force. Trochi tale: a person prepared for this moment again and again, and when it came time to do the thing, they still weren't ready

the seventh one is messium who created cleanliness in concept, force of cleanliness imagined. Mesem. Tacit tact of cleanliness. A highly experimental force and a well chewed over and comforting torment to the lonely. Huge Soap Pool.
In which you are fixating upon cleanliness. Trok tale: torment of mime of mesmerizing is there to test out reliance This is of the essence of cleanliness, and as such essence not really cleaning, which can cause bodies to flare up, in need of a sensitivity often too often overused, such as an extinct addiction to soap, and the essence of cleanliness is a demon you will not fight; preferences picky, working to examine need, quality of divining origin.

the eighth one is echidna of betting, imagined gambling, and even real gambling in as little as it makes any communist difference, at which the whole Universe belongs to you, that one, significant of the rapture of this comment. Echiche. A Commune-ist force.
In which you are betting. Trochi. The Sun is a Common Symbol. To which a universe of betting is found, nonparallel, which trains the about-ness to selection, where one confronts choices, itemized, for preferences, which we have mentioned, which works to form a universe, or a care, to the quality of selection.

The ninth is ometeotl force of fixation in the stars or the force of alienation, or also the force of imagining emotions. Ometaatemo. Force alienating in transfixation. Takes care of many, many things you cannot do.
In this you are fixating upon bright points. Trok. Emerald. The rigidly held universe of ometeotl is not to cross, and stays splayed out, erect, with time itself; preferences of the gaudy and garnished, works to play up shine, carving, tensions and all manner of decoration, quality is fascinating.

The tenth one of the sixteen forces of first creation that came about when, all nine of them were still losing their selves and complacency(identity), when the stars started to grow dim and when this force of fixation lit them in their whisper and came about what was as an element projection, not this of exercise, as an identity of relaxation, failure, and necessary loss, or losing for necessary reason. I called this one Oogly Googly Moogly, and I meant death, of the imagining.There are scientific steps to forces here then you are messing with something on the stellar/nuclear level not even real for the amount of organization to make it seem real after this force point. Oogoogmugumgoogoo. The unreasoning one. Mother-of-Pearl Shell…made to look like Star.
You are making death. Trochia. What won't succeed at first, will never succeed and thus we have the mimicry of Oogly Googly Moogly, a mime that has preferences of failure, works to fail, quality failure.

The eleventh one, identity, or force that come about, was a force of language, in which these eleven are able to share certain stellar premises and make promises to senses of all identities, and then continue this activity in order to explore a continuing development. This one of cipherology, of the symbolic, and of the exploration of things had in common, is a force usually seen as the supreme one, so that you, and I, and all of this gathering about any identities, do not see what we are not supposed to see. I called this One Para, but for our common sake I would call it Oomplompdiminish. Force of language, primarily animal but can be plant. Trochia Equator with Star. Truly put aside, kept within the parallel of the removed, is Para, the conceited and conceptual of language, preferences universal, works to describe similar universes without opening them, quality statement-like.
You seek within the force of language, not of words but in the unconcious scraping for words; you find subconscious and unconscious parallels, tidings and buildings toward language.

the 12th one that came about was born from the rest of them, and the last of

them, and this allowed this one to be even before being. This identity, or force, was able to create and define something greater than them, greater than all of them, by resting precisely on the logic formerly defined by them as well as resting precisely on the goodness defined by them, and letting that become them, as the pleasure then. This one is called Ben-Gubi or the Force of Paradise.
One finds one charmer of a force, certainly. Trochi. Harps fixated in Circle. This equates with everything rising, hopeful and successful…preferences elaborate, works to bring about equality, taste and withholding and quality is equal.

888.the 13th one that came about was the dull-one or Protogonion, aka Paradi. The dullnesses in life are used by this force, the Paradox.
One finds a reliance of a memory. Trok Couch. Dullness or being dull enough for every single game is Paradox, confronts preferences with questioning, works to “smooth” out universes, quality confronting.

the fourteenth one was called evatom for the most brilliant and most simple and definer of freedom from charity and charity from freedom, and as defined, thus to put, good points to lead us somewhere where we might be better...Evatom... aka mim Elhohle mim
One finds charity, the mimicry. Trok. Pearl. The opportunity is still out there to have everything run charitably, preferences of the essence of mimicry, works for attention, quality attention-getting.

890.the fifteenth one that came about as the force of fascination to cause this freedom in the immaterial known as argument, denial and entirety, reason and sensibility and propriety or the causing of the entity to go unto establishment, with this good sense to have some fun so that all could relax while waking up instead of becoming more humble. He(this one) gave greater peace to numbers and even helped then in the one force of fixation in stars. I called this one Zahweh, for which I am in no way to blame aka Yavay…this Force is argument. To understand this argument, everything stable in life is pinned by arguments… everything in life is activity. A still moment is death, before we reborn, spewed off from Gost, we then proceed upon life again, to be incorporated in more arguments.
Green Agate, Chrysoberyl.
One argues. Trochi. The base and the arch over it and the curvilinear back to the base are all forms of philosophy, mathematical qualities of it, and the predication in any region of it are brought to the argument of where are you going, going to be the preferences you are within the terms of philosophy or argument, and it

works only so much to argue it, and the quality is propriety.

891.
.the sixteenth one came about as the force of authority, and had the quality of putting things and themes aside that we don't need to know, no matter how much I you or they desire to, because there is no freedom available to that one or these ones to reach a quality of goodness without it, it is the most unthinkable one of all of them,Robor if you are to fight about it. I called this one Robota or roxota...force of machine or aka Autsostau
One imposes. Very-ious Recent types of Recording inventions.
Trochia You are dealing with the authority, no way around it, and it is best your preferences are to listen to this, and work with authority, and is of the quality near-obsolete.

Chapter Twenty-Six
Has things organized into depositions.
26. The FFC decided you fill up with emotion like fuel, and then you play, read, write, file into an array it out, use it all up, and then half past that point twice as far from where you used it all up, into the gray graces, using up what this secret energy source is, you go on.
17 acts appealing
The vine tendril appeals to definition in its form of origin in the Ego or Egg

arora-f. of honor of all minds(this alone in 137 makes a monumental problems for presentary physics)
Unique in favor. Trochia Big Woven Light-colored(preferably yellow or orange) Sun on the Wall. The item or force, aurora, has in it the default take of the honor of all, to establish a heaven with it, and preferences are of the limiting, works are of the limited and quality is limitless.

taxat-f. of price of having aka visiv
Qualified price. Trok. Largest Coin. Is a force at the price of having and a reasonably strong, violent and/or precarious force at that…preferences are established, works establishment, quality establishing.

shamash-f. of loss in emotion aka sinis, invented Chinese people
Draining out emotion. Trok. Manhole Cover. By the loss of emotion all events further conjured are dismissed in abstraction, and preferences are heightening, works are heightened, and quality is one of heightened awareness.

pinip-f. of laying in emotion aka bokob, of compact objects that are as books… .. …that can include brains…perhaps if we were to say there were ancients who came up with the forces, or who may possibly have made themselves into the forces, the significance of bokob, pinip, is more raw; the act of playing up on emotion leads to books or book forms
Pouring in emotion. Trok. Fat Book of Cubic Shape. Adding in emotion brings a culminate clearance to things>>themes, and these themes draw preferences to emotions…works to influence people, like, you, O, creature…quality is fat.

surus-f. of absolution aka siris
To be absolved. Trochi. Sun Comb.The whole matter is taken care of with Surus…preferences are lenient…works to absorb impression(s) about memory… quality responsive.

rivir-f of traction aka walaw, to wallow
Force of pulling…resistance while pushing. Trochi, tale: push, alight, pull, gather, coalesce, heat
Drone bomb. This one looks for those pulling excess energy around memory, I suppose, preferences token, works to provide resistance, quality effort-like.

rubur-f. of tolerance aka wavaw, particle may be the ultimate result of colliding wavelengths that have left the collision in leftover form. Huge tire-shaped Star. A physical force, a dull wake, a bland torment, a significant electronic mimicry. Trochi. Has it to the fake point as far as all of the memories(137) are concerned, preferences ample, works foreboding, and quality, ominous.

rester-f. of trickster in wait/weight
An end definition. Trochia. Strange Monument. Looks for additional inclusions to 137 Memories and edits these…preferences fore-bearing, works perspective, quality surrounding

pikip-f. of belonging aka ososo, the origin of the zoo
Belonging. Tale: the Universe is a Huge Truck. Animal Secret.
Pinip and pikip are also twins…Trok? The essence of belonging can be yours, despite, no matter what, how someone might be treating you… preferences oblique, works inclined, quality at an angle.

workrow-f. of emotion aka waraw, the origin of logic not yet well nigh, the origin of war, the word, starts in the Force of emotion; the name is, I will have to

tell you, merely coincidental…maybe if we were to think about these wakes as Memories, then the significance of the Memory is heartening, can it be, emotions are a significant form of memory…it is the realm of the emotion and no one part drawn aside as in Shamash, Sinis or Bokob, Pinip. Tale: over a division in the use of “ware”, they named this one separate from merem, and as we have first in everything what is, we have Waraw being named after merem . Sense of humor.
Of emotion{s}>perhaps plural. Trochia. The force Waraw will not be excepted, will be accepted as a force…preferences liable and works justifiable and quality undenialable.

lamal- f. of least pricing
Poverty and Still Shopping. Trok Tale: put in the Universe just so they could be certain. Piece of Cash.
The force lamal has to be the clincher, all meaning is given preferences, working to prove point, quality is undisturbed.

surbfrus-f. of pricing aka lamal has
Pricing systems. Trochia Likened to anklaalkna. Tale: equates with the worth or the value of each of our lives, all put together, this of many lives. Old Cash Register. The meaning of this is significant for treatment, preferences are of the therapeutic, works to provide therapy, quality is medium.

wendnew f. of care of having aka lokol to lock things up
Belonging to. Trochia Tale: this one is one of the primal needs. Polar Bear. Force of possession, we are stricken with feeling that too much busy is going on here to otherwise bother…preferences self-involved, works to adjust belonging I suppose, quality tempered.

kuluk f. of principle aka keyek the key/cue/clue
Root of definition. Trochi ..tale: a whole realm, where Merem spends much time with this one, takes pace with keyek Memory of Green Sun. This is kuluk, where the idea is “in” principle…Much of what can be said about ordinary forces is therefore obsolete…preferences hung up, works I suppose to suspend things, quality mnemonic.

linil f. of things on rows aka silis
Exactly as it means>>organization. Trok Tale: these forces are also kept, here, likened to this, manner, in and as of keeping. Sun Installations. This is true that everything shall occur as it should and then the forces will appear nonparallel…

preferences rigid, working slimy, quality pleasing.

907.puzup f. of undoing confusion aka valslav puzzle is originated here, perhaps the origin of mnemonics Tale: we the 17 FFC are the most sure origination of Language, plain and simple
Solving force, wake, torment, mimicry, or memory. Directions to the Sun.

talat-of making copies, the price above
The copying, as in a work of rote or the use of mnemonics. Trok. This is the key force in unlocking them, it's preferences are complex, working bio-platonic, and the quality presumptuous.

Chapter Twenty-Seven
Automatically makes lifeforms.
26.18 acts of dispelling
The vine tendril makes Ego or is sealed off to germinate

909.18almthalmtha-of acclaim, if you memorize all these wakes, this your reward
The silenced honour, similar to arora but not the same, almthalmtha doesn't imply all. Trok tale: torment trying to be most simple meaning Blueberry Sun. The honor of almthalmtha is fine, the quality of athmlathmla is protuberant and it works to excite and it's preferences are extensive.

koordook-of utter loss, and it exists in this Universe to succeed at that alone, so senses are different to the FFC{Force of First Creation) tale: '"True'" purpose Mnemosyne. Trochia. . . Red Sun. The time came and went by and then we come to koordook, lonely force still with no regret, reason leads preferences to multiply, works to swarm and quality is onerous.

911. tulut-force of resignment, apparently more important out of 137 than you can easily recognize
You sigh too much. Trok tale: let it, tulut, speak : I too, like all other '"things'", cause sleep…Blue Sun a professionally-photographed wallpaper . The glory still glows in the force of resignment, and it's preferences are of assignment, it works to bring about things and it's quality is as good as a memory. Reassign, reassign, reassign, and finally resign yourself to.

912.tuzut-force of electrocircuitousness, a mechanical wake if there ever was

one tale: a harsh force, o, Creature. Gnat-sparked Lamp.
Rigid wake, sharp or harsh force.trochi. The wake is supremely active at all hours picking all manner of information, it preferences are enraptured, and it works to encode, with its quality being conventional.

tuput-toopoot-f of sensate abstraction, not quite sensors. tale: only time passes by and choice, by Agoga, but in tuput we have touch, friction, ttilante, and the three of precious salvation, so there is some reserve of spirit in the unbroken universal incarnation without tying into any elements or metal or viral(clay) or atmosphere, and the time can be decreed for tales to come by (every moment) in tuput and merem. Any Extreme Memory of Sun.
Sensate.trok. Works to provide incarnations with necessary sense(s), preferences are one of the vague, is one of the grants of life, quality is one of preferences.

turut- f of attention between sensate abstraction and mnemonics, an operand of a wake
A real memory, or perhaps what we Are saying: mimicry.
At a fourth interrupting mention, instead of twins, we get quadruplets.trok
Tale: to all of learning of any incarnation, although we can procure presumption that there are less tools to learning with a loose more replete of essence incarnation, say one that is external to Earth, and not in the atmospheric restraint, free to go by the short age of two decades by the metal of the Star, for instance, although this recognition of the nature in creation in the Universe is not even saying what kind of learning will occur if the incarnation is bound down by planets, say the atmospheres of Mars or Uranus…unique learning is the vitality of all incarnations and this point is mainly studied in turut …the Rumor that there are Stars in There. The activities of rote and recall one, can be provided with an intelligence or entity, so that learning and its foundations can occur, preferences are one of the complex, works to summon up information, quality is abstruse.

agnanga-f of insistence
Annoying, even. Trochi. tale: oh, the force of life is draining and drawing mostly to a close of the necessity to use it now for whatever rapture now that will come of it, then what is this ‘ “force of life’ “, it must be agnanga. I, uh, don’t know but a Homemade Sun would probably qualify for this…not a single Molotov cocktail but maybe a bound sphere of them. This is the fleet image of the item force agnanga: it is a persistency baiting of appeal, recondite and abstruse in its

invisibility, has preferences of the indicative of sensation amongst forces mentioned of the searching and finding of entities, works to put any point meant to draw attention independently, quality is of the persistent.

asratarsa- f of bland delight, second level to stellar inspiration, wake familiar to Garstar, gusgi
Appeal of appall, the dark and shining, the doomed and gloaming.trok. tale: what is enjoyment in it's most inherent engagement in the Star. Spend every Sunday telling tales of the Sun. The glory of bland delight is extended here, preferences are of distinct abstraction, works to put the 'glory in God', quality is one of transferred delight.

mutum-f of gripping, of freezing, melting in mold, of tightly holding, or strongly grasping, wakes of foot-like, why gravity is not magnetism. Tale: what spreads the most diverse and profuse use of the number of incarnations one(a single spirit, One) can endure, and the answer is it is the kind of treatment that takes place in mutum. White Hair.
Holder together.trochi. The extreme of the most in holding is held in this force, preferences are of manipulation, works to provide handling, quality is of the held. Not one of the grasping forces, amongst them weldlew and wurbruw and mothom and aljta and afinifa.

mothom-f of secret of holding, the placing wake or mime or mimicry, the Great Sweater
Secret in All Description.trok. tale: surely the most exploration that could be held amongst the most challenging to learning, let us say, with the diversionary immersion in complexity and amplitude of being a human being (I don't know where that is seated) with the immense amount of tools necessary to stand that One up is in this secret. Satellite, the Lowest in flight. The more complex in holding, although not the most of, is brought about here, preferences are of distinctly specific to holding, second degree, works to provide secondary reference to holding, quality is of the secret in essence.

quamuaq f of secret of categories, token supreme force(111 steps before L.)
A plural force and a, at least, dual wake. Trok. Tale: what is not used by one incarnation, is used by it's environmentally efficient mannerisms, thus in the incarnation of some sequences of achings in the morning (Dawn) in the elementals of the essence of clay what is not used by said incarnation enduring this will proliferate to various bacteria and fungi. Hidden-in-the-Puzzle Item(s)
The force of the esoteric and inclusive, this is also called, and it stands up for

most trans-incarnation doings…preferences of the unlimited, works for a many-headed Gost, and quality is oblique.

ropor f of withholding, ultimate mystery
Dares to ask..:which one is Memory. Trochi tale: some force that binds beyond, all comprehension and the means of rote, binding, within scientific reason, life to incarnation, in the moot point Gost.
Huge counterweights or smashing balls. The terms of the mysteries remaining in the presentary phase since the Big Bang are yet to be revealed, preferences are to the unlimited, works to enlighten and choice qualities are enlightening.

relvmer f of religious prevarication, the Memory must have honor!; of the obviating in initial meaning; made decision a long time ago about the Angels, the Ancient Angels and even God of 27 tale: the angels chose this one. Religion is a Memory.
Origin of all known religion. Trochi. The religion is of appeal in this one, preferences are of delight, works to provide delight, and is of the choice quality delightful.

kuysnuk f of first reference, wake probably busy getting initial witness to everything
First referring, to, of, probably an energy object. Trochi.. tale: more important than merem, there is kuysnuk to deal with, and what cannot be saved by vast Memories, say, in a human being, will be saved by the Envyrunment Fourth in the realm of the zoo …Echidna. The most important element of being a memory alone, not so seen for being a force as well, the first cue/clue/things>>themes are found here in this hereness; preferences are of the disengaged, works to separate references, quality is one of the specific.

punzlup f of fusion(a stellar secret), this wake is one reason the FFC are so concerned with the FCU(First Creator Universe)
Secret of the Incarnations. Trok Tale: locked up in Stars, which are what?...huge masses of matter that ended cooking with friction, light and heat to say nothing of how much electricity is in one..is this secret. Unmentioned or Unmentionable Sun or Star. The force called fusion is given singular clear reference here in this hereness, and challenge is had of the preferential as to the validity, sealed, of fusion, works to bring all within under the realm of fusion, such as tides; quality of fusion.

atratra f of recognition, wake must possess a tremendous tolerance to

excitement, the Most Evenly Tempered One tale: by any other name Clear Description of the Sun.
Fame. Trochi. Attention-bearing-deficit-creating, atratra prefers to bring about recognition, works to hang recall, quality is one the Enumerator.

amtramtra f of utter gain, definitely would be a solar power
Utter gain. Trochia tale : accomplishment Largest Motor Boat. The total gain by All is measured by this one; preferences of the otherwise respected, works to be otherwise respected and quality is of the otherwise in respect.

926.azaza f of mind in respect, a fixator and the Creator of Angels; tale: they will follow each other over this one. Porcupine or pangolin.
The tamer. Trok. Brings the Mind in, preferences of the finely vague, works to assume positions, quality is one of the punched-through in feedback.

The time has not come about for Precious Salvation in the Time Before the Earth had Seas, but these One Hundred and Thirty Seven memories or mimes can still memorized that Way in today's precious time. The Forces of First Creation just are the cause of cases inevitably a unique and unbelievably significant group of definitions that have to be accepted, it bears upon me with angelic grief, and I have to tell you so.
The Precious Salvation can still be yours, and I tell you to increase your prayer in the way that the Ancient Angels who Art forthcoming shall have your salvation.
There it is, in the name of Memeri or Dimsid, the complete Sum of """music"""s, or Mimicries or Mimes or Memories. Or collect in Mnemosyne, o, Creature, what would not remain in Mimicry.
Fusion and Precious Salvation much clear the temperament.
And the echoic reverberation of Amtramtra, Artmartma, much clears the fusion.
The Win by the Law of Firif, furuf, vuruv, viriv, resounded, is a Growth to the Optimum Advantage. During the Creation of Earth, they (the FFC) woke Everything up to a tremendous level…the Creation of Earth lasted a billion years, and that level of awareness must had it's affect. Among the Creations was a tremendous God-ego of Sol incarnation. Sol incarnation has never lasted more than two decades.
That's it, the complete set of forces you are brought awake by, or the complete set of wakes that you contemplate by, or the complete set of torments you pull apart things symbolically with, or the complete set of mimes of awakening, the

complete set of mimicries that Memory is; these that are known as philosifistatics and that you pursue knowledge as such.

Makes for the likely probability of theatre.
Although the tree of all puts people to sleep, the forces do their job and work up a considerable bore and put people to sleep, too…although just incarnations from Planet Earth, which began in Stone…check with Dimsid if you want to recover from insomnia.
Within the Seven FFC there are six sleeping orbits…this is how the Forces a-wake-n.

Chapter Twenty-Eight

27.
I truly believe in God, without which what are these long attempts at memorizing?...what are these long writs for? Only God clarifies that.
God makes for great Sympathy, which with things>themes>theories>therenesses can be explored.
Here comes the part where he mentions god…they are of the structure selected for. These Gods took a bet a long time ago and dwell by that name by what made it sacred, the Earth. They do not dwell in the vast outreaches of Outer Space unless pursuing some one.
There are two Gods. Here is this smaller one. Just one pause there, now, does the BoT have logic in it? Well, god, the sound, searches out logic but we will get to it later on.
God makes patience stand. God makes for reserve in patience. God makes for slow expression of ideas.
This god has everything that searches Out Authorities in the Realm, where it exists, whereas as the other god, the one of 27 parts, after this, imposes them.
This god may be relied upon for the Category Authorities.
God makes excitement unpeel in a raw and enthusiastic manner.
These God may be referred to as the insides of any request by prayer to the pure minimum powers of God, simply by writing of it or the encoding remembered for it, the small name of God, in a place or even in a display by artistic means of the name, be it Omerius, Aklara, Azanara or Xenocotl, Wodkekei, for example.
This writing can be had to have a separate effect than any rote, and it is of a pleasant effect, and it is also of an enduring effect.
This out-writing has an immediate effect by strongly calling the names in a supplicatory manner.
God has a certain and complex build which He needs satisfied by suggestion, recognizance and memorization.

God makes for Obliged Addressing with the help of Precious Salvation.
When everything might prove so easy, God proves His uniqueness by doing things the hard way…being unprepared to face emergency, yet cautious, anxious, and future-telling will wait the God, but having every way to rush about and bring to Mind solutions when emergency happens, God is innately prepared for the oncoming. He can be thanked for the usualness of His immediacy at any time and He will easily Know.
God is a ramification plurality as a circularity, and upon memorizing Its' singularity, it grows strong in the solutional regime.
God will insure you get it done, whatever it is you will. That is, if you do memorize what is right about God. These two lists bring out things most scientifically right about God, so that when you find the Geometrically Cutting in Death, part Replete in Essence and Precious in Salvation, you will be prepared for Reincarnation. The study of God will however meandering, prepare you for the present into whichever zoological form that you are ready to be Reincarnated by, whether it be stone(clay), virus, bacteria, extreme-owe-file, plant, fish or animal(bird). The sphere of God is a study of Incarnation.
These God are the test for those who are not distracted by the forces, before; they are the passage for those who are not obsessed with the memories, before; they are the passing, excusing and withering-out for those not contained by the wakes, Mimicries or Mimes.
These God became the Fixation and Fixating of the Ego., made by the judges… not the God-ego of Solar origination.
God has good reasons for one to be enthusiastic about.
God the Finder of Authorities…Vine tendril
Makes the Ego fixated.

Of thirteen spirits
Naked and unfamished

927Tmulogog-magnetism, absolute holding power, faith, choosing the"I" called God
928Condegog-electricity, second energy, belief, disgust
929.Kadlenoi-reflection, mirroring capacity, precious salvation, ruminations
930.Camareka -penetration, extra reproductive capacity, precious salvation, instinct
931Wickegik-transferral, more extra reproductive capacitousness, precious salvation, learning
932.Ttilante-friction, innate touch of the ghostly-incarnation, center-sense, worth

of wait
933.Wodkekei-decay, rate of reaction response, outer-sense, eventuality

This God doesn't make sound and is silent and if you are, it will creep up on you with that volume
it uses as a sense.Once called Mars, now called Kamakuda. Probably exists by Planet Neptune.
The story with it’s logic and vines-tendrils continues.

Chapter Twenty-Nine
The uniqueness of various states of magnetism, including attention.
28.
Chap.28 noipoin
God the very most second, and relevant time in God the Imposer exists in and around Uranus…
God the Imposer of Authorities…940 to 967.
The vine tendril, or Our Concept of Life, particularly odd collection of 2 and 3 from 11 to 37, fixates the Superego, a higher intelligence thing of nervous responses, in preparation for life, language and the Almighty Thereafter.

.1omerius-transmitted transmutative microcarving love & hope
You are meditating to the highest degree of concentration.
2myarkab-capacitor fixation in nuclear capacity in trust
You have explored your physical limit, or are using your will to this part of stretching.
3abvyorna-potentialization in loops in noble love
You are entertaining the most entertained thought.
4veltsha-density matriculation in valorous or romantic love
You are breaking a decorative sweat.

5arka-magnetic pole or magnification of such decay in stern trust
You are holding on to your primary projection.
6nuklea- magnetic wax wane in wise waiting
One, or you, are/is concerned with other holdings.—-
7aklara-coshielding affinity axis sympathetic flow route in mortal limiting
You are riding down the main conduit of the judgement of God.
8amarmazipi-trailing complicity in social appeal
You appeal to the main appeal of God.
9grivlibidna-texture ambiguity or equal privation of repetitive tiling
One is under the influence of sensors in the most sensate sensitivity of God.
0arkturi- percent presentary capture in mortality the unending reaction of a temperance in knowing of...
One is put by the time spent w/ God.
11kthurina-osmotic absorption presumption of plasma the confrontation
Any number of complex sensations, from awakening from sleep, to sweating or brushing one’s self, to liquid, even echoing in the air.
12glutalagus-current deposition of judgement information
A withholding element.
13mormvent-depth network impactings of souls
A strong emotion, control or ignore will be had.
14onsopati-heat recall regression as passing fates
Mainly used to play through stellar radiation…twinkling, weathering or displacement.
15ilyenta-gravity efficiency fixation of common knowledge
Deep in the digestion is the effect of God.
16kolumenvi-detecting insulation fixation & prompt levitation of glee
Highest rops of roaming humor in romance.
17kopenda-wavelength perforation to binary feed of genetics, "demon"s(creatures), aeons
The fingers, multitudinous, of God.
18ausirmu-complete limiting indentation amplitude&constant touch division of fatal attraction
Position of self-judgement.
19kayalinto-extended rotation decay-limiting of good congress
The impotence of God is for fear, hence.
20obnyorna-acid/lime disposition in expression&exclusive inhabitor of regressed and merry ingress
The recycling qualities found in this God are surprising.
21azanara-super-recognition synchronization of good after first evil

Ideal of entertaining intelligence.
22amanazri-frozen falling (weight/pressure)
Has to do with the Dead.
23abkolurzi-wavelength acquisition & storage of replicant moments
God’s survival senses.
24oqzakta-twinned recognition or automatic creation
Comes from within the communication of God
25obsepatha-retranslating prediction or challenge(built of the parts of frequency or deposition)
One of the inner elements of God.
26kamnali-crude reproduction reuse(or the good magic of slightest suggestion to bewhilst drawing)
With thought comes the ego..
965.27obseques-crude factory presumption in as of an imitated collapse(redefiner of wonderment)
Recycling element of God, guarantees He will never show Age as said God.

Chapter Thirty
Scientifically one might wonder why do these things have to go on...what situation of the stars and atoms causes these things...? Is it that when these don't work, this One lightnings or thunders? What routines occur beside awakened and sleep, binding and apportioning? What of the weather, anyhow? Does it seem as if Spirits are peering out of the Gloaming…yes it might…these spirits are called Wurgonna…they regulate the day and dictate every means of tensate and cloud a’crumbling.

The faces are ensconced, bepuzzling, idiot, into the whole drama.

.Of the beings,ayvytyrs, mainstay of minds, and the judges, destroyers.

This consists of some pretty strong complete abstract distractions that are memorable in life's incidents or during life's events, as having contentions not intentions.
These phase out from directions to distractions to a distortion called god by the universe, but not as the unusual, normal ones would have it, called God by the Universe. Memory is many things because of the FFC…and God is the pinnacle of the appreciable of the acceptable in the middle of the many things…this causes a coincidence known as the ego when mind has to deal with having an

incarnation…the more defined an incarnation, the more definite an incarnation, the more it has to deal with having a mind in the facility known as the ego.
These consist in existence of these beings whose names literally occur as sones or sound; these twenty two beings of the group Wurgonna, that occur as distraction and occur as following the qualities of the entity in emanation, and emancipation of self or merely as the individual, at least I will put it that way, of course, what other way am I going to put it.
These also deal with piled-up reincarnations…or sequences of incarnations.
They are very presumptuous. They have to deal with their immediacy to preface judgement. They have techniques to do this. Also they divide up the land by egos. The replete essence is given to war or work by two wrinkles, one of the Ego and one of Precious Salvation.
They also tend to whip up and hasten the environment.
A weathering is put forth, as we launch upon Wurgonna.

The first one was a being(created by Agog, primeval force of time) that could travel back through time, or back within time or back against time. It possesses no quality of language, at least none that can be mentioned, and it assists in giant/ midget ways we really don't know about. It has this quality known as worship, or birth, sort of an agape sympathy, or the keeping of worship for another, or the worship of the lovely and/or the lowly. It is a being earlier than God. I called this one Reptune though it might be called Pretune, Advertine, Invertine, Obrelvetine or Pharos, to complete that wordiness. It is really largely unspeakable, unwritten and unknowable.
Travels back in time to sympathize with yourself.
Ahrimaiz
Orizuum
it is id Reptune we praise
as earlier says

968.the second being was a fact called guidance, as addition in simple principle, made to add all up and guide, add it all up and guide us all, and protect this quality of being that is being from all other beings as better by a force of sentiment. The Demonstrator and I made do of the fact this was the third God the First Kreator counted by calling this one God as he, or Genera as she.
This great being is the empty statement in this write.

969.the third being was a fact called charity, or that word coming into spontaneous memory, or the principle of imagining something so that since it is desirable it becomes more and more there. I called this one Mot, or was told to, because it, Mot, comes about when things are in the effect of their birth, but

anyway there is a saying that symbols make the sound that is always the name of the one who is overtly charitable. She is a very strange understanding about the principles of goodness.
One finds charity, the being.

970.the fourth being is a very good fineness of fact who creates a beautiful feeling of society so that all can cooperate in using information they don't all know about in order to find out what it is all about. It has this fact or quality known as memory recall. I gave this one the name Denebola, or said name was drawn from me.
Loosest of the liquids.

971.the fifth being is a being of supreme relaxation and supreme strength to overwhelm all things .What this one knows better than all the rest is how to keep the temper. I called this one Tantrum, because it just so turns out that too much or too little dependency on this one is delusional. It has the quality of equality, or of equation, which is the putting of an abstraction or an objection between two other objections or abstractions so we, or only one, can find out what is needed to know about. He is very great.
Tensate.

972.the sixth being is a being of infinite forgiveness, all full of love and hope and love for all creatures. It has this quality of attendance, a form of enlistment. It is called Orgasmos. She cannot be fought.
Conversation.

973.the seventh one is a fact called peace or by the name of Pacifica, quietly called and used to save time, who knows how to compare and settle some weight of unimagining on all opposites to calm others down. This being defined a quality called exploration, a sleeping focus of a quality that is you just have to try. He, she or it was named to me Pacifica.
An angelic being seen in and around the 11 FFC, which it helped to define.

974.the eighth one is a being that does caretaking for everything that cannot defend itself, whether it is sleeping, young or at a loss. It defined this quality known as reproduction, or the creation from another thing that appears similar. I called this Babalisinos.
Progenitor.

975.the ninth one-is a being of infinite slyness, and infinite goodness and infinite sympathy. It takes small weaknesses and rearranges them or pulls them away so that others might live in a better way. There is no English name other than slyness of demeanor of dimension it would, or could be called. I called this one Transpara, but get this, for want of a better name. It has the quality known as subtraction.

Sly.

976.the tenth one is a being that silences everything -that stops all chatter, that stops all unnecessary vibrations to the senses of those that do matter. It, she or he has this quality known as activity, for the utmost necessary reason. I called this one Hatshepsut, to imply it as a crocodile goddess.

Repeated peace.

977.the eleventh one is a being that dominated everything, through humor, to see if they are able to make their own choices for the betterment of everything, or if everyone but this one regresses to a lowliness, then what this being uses is this occurrence that is defined as a humor that is kept away. I called this one Machus, or Nachma, for no better name occurred to me. It uses this quality known as emulation.

Great One.

978.the twelfth one is a being that defines a common principle or pattern to all who exist or have certain energies so that they might cooperate for the best reason, and for the betterment of all. It has this quality known as appointment, and I called her Psyche.

Cue/clue.

979.the thirteenth one is a being that defines a fact as all-knowing. This one be the one that records everything. It has this quality known as inactive. I called this one Media. This being is involved in dreams and nightmares.

Recording.

980.the fourteenth one is a being that endures through all storms, be they ever so small in nature, or ever too large to defeat us, almost. It has this quality known as code, or the keeping of a particular sequence to play through. We will call this one Temmenu.

Meaning, deep.

981.the fifteenth one is a being that poses self-destruction before all else so they can know their own limit, or poses god, God, in repetitions and as wearing as possible, as the self-same phase of the list, or so, in case they want to know how they may be causing themselves suffering, they can. Familiar with ego death.

This one is called Scapula.

Culprit-bone, seen around 15 FFC.

982.the sixteenth being is called Eototl, and in principle deals with substitution, or the gradual finding out of things for the betterment of all, as a word.

Charity for concern.

983.the seventeenth being exists as pure faith to get us through all things,

and it is good for the purpose of all identities and also for the energies they will control or that these will then control them if they are evil. It has this quality known as invention, or the making of something according to some similiarities in knowing, honest. We will call this one Testa.
Hard-seed.

984.the eighteenth one is called Histoire. It exists as beautitude, and has a vague stellar feeling to all things that have passed. It has this quality known as body memory.
Delicacy.

985.the nineteenth one is a being possessed by the fact there can be a lesson to be taught all things, no matter what they are, as long as they are something, great and small, that gives up a knowing to all, universal as thing, them or theory. It has this quality known as arrangement, a form of enlistment, as a word. I called this one Cylos, for no particular reason.
Lesson, seen around 18 FFC.

986.the twentieth is one of supreme genius, whom is known to share that with, well, just about anyone. It has defined more names of goodness than any other being. It, or he, has a quality so defined as multiplication, though that can become so many more things, in time. Or you can call the most initial reaction in learning. I called this one Inspirus. It is indicative that under Robota , though, that entertainment is multiplicity.
Wisest.

987.the twenty first of these beings, one of these beings, was and is who reads all ciphers in order to outwit them for the fact of good. It has this quality I called earlier the word: ignore, when I was trying to get away and through with something involved in this tale Demonstrator was in the act of telling me. Ignore should mean, thus as a word, to really have a mind to never be bothered. I called this one Oovus, or Ovus.
Silenced.

988.the twenty second one was called Anvilium to suggest that quality I find in you. It does projection, or all amplitude or all use of clarity to create a fact to reach something when in need of help, or in fact, if you really need to have help. It has this quality we so know as suggestion, in a word, as a word, even if words are useless now.
Projector.
These beings preside of the nature of politics, interference and consumption to the extent that one can hardly tell that a mass effect is there.
The vine tendril makes Ego, are looked at, are overlooked, and are germination.
Remaining count: 145-22=123

The judges are known the also known names as these are the Avaterm, the Arimbik, these are collected in Akashik these faces of the facets of god called the Anima … logic later on……..
Their anima egg was taken by the FFC to make an ego, Ego.
They always hold court, and are there for your own self-help.
The reserves put in hesitant and reticulately behavior are brought about by the egos of the judges. Incarnation upon Sol usually makes one egoless after the incarnation evolves…this is because of the judgements of Amalamachagra. Many things are due to Amalamachagra, in fact, it is truly humbling how many things are due to Amalamachagra. Called Amalamachagra not Meshenabek.
.
30.Chapter Thirty

A mindless, mind-body measurement of energy, nevertheless.
988.the judges
The more sober you are, the more bringing things>>themes to court will be. If you are free from alcohol and tobacco, a-Court-ing the essence of what you decide needs judging and is all the more easy. The essence of a gathering, intelligences, entities is more easily decided to be more on the growing point with the essence of the universe free from the nonsense of Incarnations than simply a thing>>theme that probably won't exist.
The essence of recognition or recognizance is hereby recognized as part and parcel, pact to Amalamachagra.

The first judge was called Ion.It has this quality known as differientiation, analysis or antithesis, or as a word, spreading.989.
the second judge was called rok or num it has this quality known as experience it defines things as passing, past.990.
the third judge was called Sin. It exists in nothingness, or in all the nothingness it can. It defines a perfection or a goodness known as nobody move, nobody moves and no body moved, with the other half of that perfection being defined as did that identity move for only good reason. It, Sin, defines all recall, reincarnation, retribution and redemption, so it was told. 991.
992.the fourth judge was called Rod, because I wanted to call it that, though it might be the same name we always use, anyhow. It exists in all things to go on out. It has this quality known as timed sequence or patterning, or as pacing, or necessarily, as negative decision or demand.
the fifth judge was called Bos...

we interrupt this point called Bos to bring the rest of the story having, exposed yourself to so much, it comes about to occur is that God may be made into a machine...To serve you in dreams and this is one ex machina, this book. 993.the fifth judge was called Bos this one can unbalance all that is not good enough It has this quality known in a phrase known as theory in relation to control, or in words, lesser cleanliness.

994.the sixth judge was called Yag or Lalanoe. It exists as disintegration, to save all in that for the purposes of good, for good. It has this quality known as the unnecessary number, one number unravels all, deliberate mistake, in a word, viral.

995.the seventh one is a judge known as Gog, or Antares. It exist as the certainty of awareness.It has this quality of decision-making.

996.the eighth judge is known as Rel It exists to give good rewards to who is most good, and it has the quality of forcing proof. it gives off this quality of integration, synthesis or leap permutation.

997.the ninth judge is known as Gna, which is this quality known as certainty in creation, or the forthcoming. It, she, has this quality so given off that in the definition of space all that is true can be proved, or anti numerical, or in a word, decision.

998.10the tenth one is Pan of Aldebaran that is. It creates the love of poverty, so that an identity called time might exist for the purpose of it's own dream. It has this quality, given off, of the self-serving, mathematics, such as the magic square, moebius strip or the computer; this can be put as a word, inploration, or as two words, supreme cleanliness.

999.11the eleventh judge is called Twa, or Fomalhaut It deals with group obsession in any form, whore or hermit, collectivist as a sociologist or occurring as an occasional loner. It is really pleasant to be. It has this quality known as the put together as going apart and never reaching a sum, or as multiplication becoming division but never reaching a sum. A certain facet of the energies is called Twa; Demonstrator says it is the same as a star. Angels own reading rights to Twa.

1000.12 The twelfth judge was called Sam, by me, to mean, brutality in or as patience. It gives off this quality of defining a sum again and again, second sum or difference, sometimes in terms of moving a decimal point.

1001.13. Xhi or icarus It defines necessary sacrifice or fame. It gives off this quality called in a phrase: inspiration, subemotion or subscience, like metaphysics is.

1002.14The fourteenth judge is called nut It balances contentment and desirability, the unconcious and the conceit of the conscious. It gives off this

quality described as reliance on both numbers and symbols, and the fact of description of anyone or another.

1003.15kem it is defined as the necessary exercise between one dimension and two and three and four of the Star.it has the quality of using a given group of quantities in order to accomplish a purpose in manipulating space, as a phrase: whereas points add up to planes and are divided by lines into folds, and in one word: mind-bend.

1004.16. tyr it is defined as the evident and the evidence It has this quality known as definition of n difference or any specific definition of a sum is part of the solution to the problem or any definition as part of the solution

1005.17. nad also called shaddai like god It brings about storms, why I do not know, but as supposed good in doing so It gives off this tactic, that there might be a frozen physical imperative which causes the initiative to change(physics) whereby this quality is called undenialable.

1006.18 the eighteenth judge or ordinary destroyer is called kia it has this fact known as preserving the force of creation or any force of creation that can exist it has this quality known as anti-originative, or near patterning or near sequencing, inviting although not quite right or which is the mathematics to figure it all out or you as a test once we no longer need the pass and fail, the push and fell or parts and fact

1007.19min is the essence of frugality it means the essence of frugality it has this quality to exist as the will to bring about the simplest symbolism of numbers or the simplest use of any gathering. The quality of symbolism has as this point whereas what is there is as a collection a liability a probability

100820lug it is a protection from the stupid it has to mathematics skip theory(is considered this judgement like traditional science of one another :. "self-evident") or the fact that memory does not always occur at the same speed

1009.21zoe or oozlazoom this is the most pure the most clear making greater and greater clarity and the most chaste this judge takes on all the concerns of those who are keeping to their own self it has this quality to work on the knowing of operations such as plus minus divide multiply and further on from that since within this one judgment occurs as the distinct possibility to make more of these operations

1010.22bea or algenubi it is the most ineffable, the one that escapes most of all that is and that will ever be, and that is most unsensed and invisible of things. She, or it, has this quality of reflecting on the symbol for 0, or in a word, antibet.

These judges preside in every manner of courting with the Undefined.
The anima-egg and vine-tendril continue.

Remaining count:123-22=101 remaining files to our book but actually 1230 names of god be in the BoT…1231 if you include the name god.
Logic comes about this much later, right after this…

Chapter Thirty-One
31.
The coming about of dreams in the most vague quality.
chap.31
When one confronts the story knowing it is to be about the creation of Earth in the most implied, inherent, impersonal way, one doesn't do it with a reasonable accomplishmentarian premise…one just is climbing the interpreting to have an idea of what sort of story…the story is encoded in sleep until I can pull it forth… but it doesn't have a compare: rock that I would climb, machine to make a vehicle, book that I would pen; none of these are worth the actual doing of this encoding.
The beginning of Plan-it Earth as a gathering:
the sixty demons and angels and entities that are put forth here:
The demons kept causing trouble with the system of Sleep the Universe had conjured, raising doubt where Nakr was concerned and taking Her dreams of fortune telling and making meek, trembling and ineffectual the dreams of the Incarnations of Old, those strange(well they were estranged) Ones…so the First Creator of the Universe decided to give all the Demons Paradises so that they would be bound to some good, some concept of good and some conceit of good…maybe he was just tired of using them for a Water Sound Sleep Recording…these '"'Paradises'"' were or consisted of these Pacts, Phrases that they would memorize, making more clear their individual power.
The previous parts of this and the multitude of figures just within those sections before this happen to have build up(just like they will if you read and then sleep, coming to awake on the First Forces of Creation and then phasing or coming to rest upon the fronds of contemplation whence concerning the avatars and the avaterms before you come to this[there is also some god, God, in there, those initially resist development{has to do with the creation of Earth])place where there is reference, here, to the Creation of Earth. The seven days of the creation of Earth involve a number each of 31.57… and there is much to be said about Earth. The creation of Earth begins however, at this time when the demons(demonesses) settled in with the patient angels, and two groups, one of 36 and one of 24, to go on about it at great length, of these Imps, forming a third to each pact : they are all counted as one, otherwise the count of this book would

be 1231. Despite maybe having other obligations in the Universe, the evilest of all demons gathered around Earth to claim their forensic fixation a form of incarnation; having fooled many a spirit they ended up falling into the forming Earth.
I say they are evilest because they are; well, you the reader could ask ,’”Why bother with them, for they are hopeless with evil?’”… it is not like that, the very most ancient forces of infamy, they are perfectly responsible in their evil, and own in with angels in servicing it. The FFC(Forces of First Creation) and the beings as well as God, Genera, Wurgonna, and the judges(Amalamachagra) all make (biological) people sleep, as well as do the Demons that Dwell Below, and in fact Coma is to be risked, there is so much causing of sleep going on. The truth of the evilest is in fact a mystery, and a far out beacon for the sleeping innocent soul, who would use this mystery to scry out dangers. The truth of them being evil is such that no one will pay any attention…affairs of wealth and recycling are of such great repute, surely they have produced a source of pure evil, but it is not that, unless we are willing to admit that…anyways, such is the reckoning of their infamous lives that they are also names of God. They bring an evil of remarkable maturity to “‘Earth’”, a new substance since 5 billion years ago.
The demons that dwell below are fantastical, specializing in crop circles, the return of children’s toys, the glorification of awakening, the centering in living, the life of animals in inhospitable environments, occasional reincarnations to the Sun…in the Sun…though usually such a reincarnation burns out, also, they specialize in seances and precious gem stones; the instincts around taste are gathered at the senses by them, colors are studied for wear, and “insects” of attention are gathered around the pictorial or around depths of sound, in the case of the blind… .. . The cases of what they do goes on and on, for they are to blame for fossils, and to blame for clean water on a salty globe, and to blame for all manner of meeting, aggrandizing and human societies. They specialize in remembering, and reminders by them are especially optic, vocal and self-centering. A mystery of abandonment, recollection and misplaced taxation grows from them. They have bound down the betting force (Echidna), and cooperate in every manner of corruption, misalignment and debasement, but the admittance to demons by the law of possession by modern-day psychiatry would be comforting. They specialize in every manner of self- witness. They reserve to evil all manner of activity, and not one day goes by without complaint about them, but they are concerned with long life, morals, and vicarious Existence. Complaints can be had, but will cause Earthquakes, so everybody knows to tread lightly concerning them. However, without complaints, just as a starting place to

add those up, the demons can be particularly obnoxious with nightmares…it all depends on what demons you mean.
Excuses will be had, and the Demons That Dwell Below are to be forgiven by most who live on Earth, if only because they make it good for frogs and toads to live there, too. They have tried to raise as many creatures as possible, and to commit fantastic work into reincarnation by Sol (the Sun) for the Dead, which is often impossible. They have a merger with the Creation of other creatures with Imps or karmas, that follow Logos.
They Made a Vast Plan(due and doomed to evolve), to make a center of living. This Centre of Living is the harbinger of all Manner of New Law and New Protocol, and will bring about Sudden Adventure Pattern Platforms of all manner of capitalism and capitalization.
This center of living was the Earth, by the Moon, between Mars and Venus, like father and mother. They go about making pacts that infer each one of these demons off with an angelic compatriot and then one of the karmas. The memories of the dead are disguised away in these bindings(Pacts).
The Tree of All put everyone asleep and everything came about with everybody…the universe demanded substance It could inhabit for all, and all the Angels and Demons, whose main positive point happened to be Long Life, put it together for them. In the long run of a story so tremendous there is no time for it here, the Earth formed and coalesced with and went unhinging around the Moon. It finally settled into a burning ball of water.
There was much demand for Incarnation and Re-Incarnation among the residents of the Universe at this time, who centered their time around this ball of Glory, Earth.
The harmonic as Any sequence of color in incarnated at some time like here, the time these conceptual fore-puts refers to.
To make a long story short this demand to inhabit a lot of substance tended to make minerals diverse, and Earth was a fruitful place. The minerals inhabited a rainbow of colors and were both clear and opaque.
They know the age of Earth from a piece of blue zircon found in Australia, it is four billion years. That makes these demons(demonesses)damned old, I would add, I wouldn’t want to mess with them.
The First Creator of the Universe rules over demons with His(Her) demon Kalidirtgod…also known as Isitipraise, another word for prayer. The truth is this demon may involve some interaction with subatomic programming, known Universe-wide as Systema. Sudden Adventure Pattern Platforms that are noteworthy of this demon’s doing include Behavior and Temptation in History.
The largest region of dark matter, Hell, is inhabited by the Demons that dwell

below…people, spirits, the dead and those who have become egoless over the centuries, and Imps, all belong to a large group called the necropopuli, centering around Urania and Echo(aeon), amongst others. The necropopuli of Heaven and Hell consists of some vital memorial energies that can plug up the Void. Following these energies consists of finding Precious Precocious Liabilities in History and making Law. The Law of Firif, Furuf, consists of all sorts of chemistry, with Gateway Drugs being a significant use of this same Space, in animals and plants, to say nothing of bacteria. The Khemystropopuli(of the biologically living) is different in Sudden Adventure Pattern Platforms from this so witnessed in History. The Sakr point Deka(dela) contributes a lot to these Sudden Adventure Pattern Platforms…but they are still affected by demons… and Angels, as concerns History.
The echo-sphere and etka-sphere both contribute to your vine-tendril…and your consequent anima-egg.
Life is born upon the Seas of Earth with the vine-tendril and anima-egg.
The Question of Time remains didst these same vine-tendrils become extreme-owe-files?
The ogle-sphere will definitely find it's way out of this Hell, no matter how many heavens you stack on top of it. These demons are also known as the wargods, what with their manner of working inspiration.
Demons haunt the shadow and shortening-parse the breath, playing for extinction a final gall. They permanently bind up the unappreciative and unapologetic short-lived young one and add the contempt of ever widening wakes to the aged. They are responsible for all spiritual bindings and make a big deal, a big to-do and a grand affair of it, only losing the lease to angels if personally threatened, largely lugubriously held in in-depth focus or moved in the owing range through the ever-most unappealing and tiresome graces of madness.
You can fight demons if you add age to experience to enthusiasm, all three and work most on it. Fighting your demons helps you to become a more secure and mostly brave person. You never heard of fighting your angels, but this has to be done too, to remember God has 1231 masks and name-words and definition-validities to deal with. I say, dear Demonstrator, one form of god, god is only a name for something else.

These are demons, angels and karmas or Imps(beings in principle). Take their advice or bit of wisdom, seriously, as a pact between the two, and three.
Thirty One_____
1011-1069 the demons that dwell below...

Demons inspect everything I do...60 dimns dwell but what use are these fools
But what does a demon happen to be?
1. a bad thought or a process of the Universe, based upon Dis first looking for death, and the filing off of all information as frequency or deposition, the ringing or forming of atoms; a bad thought it may be, but deliberate?
2. a bad mention; reputation
3. a look askance of the worst demons of the factor 111x 60 or the antichrist group, or of Kalidirtgod
4. a thing of evil
5.a monitor of lunacy or a fallen angel or a thing of nothing
6 a curse
7. a curse carrier
8. a curse across all crowds
9. The list goes on and on but what if they are precious and form some bridge, blanket and beacon in their worth
10. Reputedly these 60 dimns make everything small become true; they are most concerned with the force of recovery, Primirp or anahata
11.How stained in stigma they become and how laced up in dogma are these headless ones

The refreshment from rote, that is all there is.
I inject more trash:
'The demons did what? Started at some diamond, and began making life out of little parts. Well, it is flying airplanes out there now, all for the benefit of some tobacco preserved in alcohol…all to make one puke when one doesn't want to remember how much that hemp mutated by radioactive elements: marijuana;…

jimsonweed, ibogaine and mate come clean when future dwellers feel so contented with how they've confronted science, the Big One.'- to quote myself
'What if the code to all of this is syfr, not temmenu, hmmm, like a warm cup of indigenous coffee, impossible to the taste to decipher.'-f*ck Demonstrator already to quote Him
At any rate, drawing information out of oneself and drawing up the spiritual aren't too different if I so want to say…if I do want to say, but maybe I get the feeling of sort of being pushed by artificial intelligence.
The demons have within the domain to presume and draw conclusion the same way as I have to confront familiars and Incarnations.

The Gurgles…:
At any rate, angels are seen as something real…this couldn't be further from the truth, where anything angelic is known as acts of charity, optional sponsorship or according funding. The attempt to know angels as real shall be given the name, Ultra-Patronization, hereby.
In which Angels keep hard won advice as writs of wisdom, as they sit by Neptune waiting to cause nightmares which are unspeakable, but necessary.
The Ancient Angels are these, and they highly value memorization of the FFC.
They express their weaknesses and strengths in Gurgles of Wisdom.
They abide by these bits of wisdom, and make right immense effort, of any sort.
Of course, it takes effort of all sorts to form a law, with Sudden Adventure Pattern Platforms and Cue/Clues of all sorts, in Space, of Long Writ.
This Long Writ is already true.
They don't take well in their wisdom being crossed.
The angels can known as real from their writing in an act of Ultra-Patronization.
Their wisdom is put down, made to copy or otherwise enticed to an act of rote(usually some tool is made for memorizing, or for mnemonics); it is compared, ruthlessly, to all manner and form of wisdom that can be found to make compare. It is found to be a single one phrase, and put to the search as to whence its origin, where questioning is engaged, produced or laid as to who or how it originated. It is assembled with premonition. The phrase is seen as something threatening or foreboding.
The angels assembled with premonition upon the vine-tendrils of The Ego, and bound it down and pulled it away, pulling all manner of substance consequently to a sea, resultantly. Toward today, 'tis' jealous the winds that so sparsely and squeakily engrave the weighty response of the ego…till it weighs out and falls away, bringing a new sight, of the new Earth, today, at the far end of starts of the place called Earth.- in the name of the force murdrum, what have we here, the

victory of the Angels at the beginning of Earth…
As I imagine it, an immense Ego binds in Earth. This, or these immense egos of the gaseous incarnations of later of Stone, trees, cacti, bromeliads and viruses and bacteria, first just the lava heated sea and of extreme-owe-files, or of Metal Incarnations, this immense Ego collapses, dragging down the God who made, reproducing in its Ego-death to many smaller egos…breaking repeatedly to smaller terms of egos.
These Angels, ancient of All, discovered the Angels with the Sixty Demons that Dwell Below, to have made out on their pacts with those karmas, logos and crew, the lot of Imps, and in crude order, assembled the Sky in Disorder and made therein the Earth and bound Them in it. That where this Story gets it's tale, which is the best I can say for it, considering the various emergencies of said Demonstrator, the best that can be said…!!
They then took off to the Outer Two Planets, where they can be found today. They bound up themselves into the Outer Planets, and put two Gods at that limit, too…to define a Mentally Healthy Sphere for the Denizens of Earth, near the Moon, and Venus, and Mars, with there indicator planet for the emotions being Mercury…
The Angels are always there with demands for proper communication, etheric restraint, the lonely haunts of species distractions, and personal communicative judgement. They work their way into every life that is born, apparently because they have something to do with Incarnation. They put two and two together, to have as one thing: etheric life summation and it's public echo. They have worked their way into proper communicative judgement, just so they stand between us, humanity, and all that lies beyond, in the twilit realm of the First Creator of the Universe.
Such Harbringers of Justice lit up the Celeste with a most magnificent Display of Glory, seen on that Day and beyond, of beautiful green auroras. They declared Neptune Mental Asylum of the Universe, to contrast it with the Prison Hell Earth.
They haunt out Uranus, Planet Herschel, as a retirement home for old Gods.
And Jupiter is death for these works most alive in the Realm of the First Creator of the Universe, and Saturn is death for such as contributed to the Realm of the Rest of the Creators in the Universe.
The vine-tendrils have gained new life, as I suppose the expression will so hold for…they've completed the recognition phase of reading, and now are using identity to soothe their torment.
The incarnations early on tended to worship and endure of themselves Sol, or the Sun. The incarnation would last only two decades and then they would end up

Dead, or building Saturn and Jupiter moons as the resultant cast away(Not an incarnation).
The incarnation of communication is without indirect salvation, in this, thankfully.
The time has come to talk about salvation. Salvation is the act of being saved. Precious Salvation will mean here the act of choosing in salvation which choices to better make more efficient the efficacy of the salvation. Well, they created Earth so estimating up their heels with these acts of Precious Salvation, and so much so was the cumulative helpful affect, that I would have you estimate your memory for the memorization of these lists as amplified, strengthened, and thinned out yet getting better grip, resistance, and all-over fixation by the power, all quadrupled and everything, of Precious Salvation.
The Return of Their Adaption to Neptunian Mentality Assistances was brought by having an inherent Taxable Contributing and Participating Factor in the Factory of the Repeat of Precious Salvation. Precious Salvation is an ideal interlude to the ease in Force Magnification in Memory, the Memorable and Memories of the Memorial and their memorandum. By choosing what memories to have a care in Precious Salvation, one weeds out a lot of the chaff…if you are willing to believe and are willing to circumvent a lot of the memory processes for only these most efficient, Precious Salvation may be the cure for you…it has the tendency to clear a Sudden Adventure Pattern Platform to the most efficient Pixellated Platform…and other such things of magnification, collection and instrumentation.
All about the binding of Memory and these angelic tricks ought to do it.
The ancient most angels are valuable for their perspective…the only learned know that with time to pass, and time to sacrifice, they must have increased the Incarnation life limit a hundredfold in the Incarnations of Sol, to bring about Earth the Living. Nothing much more is known of the longer lived Incarnations of Sol, the Sun, Star of our Solar System.
The Universe maybe rang from metal Incarnation in the early days of Earth’s Creation…the days ran into months and those into years…a million centuries and They were Over for metal incarnation. Metal incarnation, What in the name of xakfax? A half of million lifetimes. The realm of meta-l incarnation shall not be due the least Ultra-Patronization.
These Angels direct dreams, watching your reaction as they make plays upon your hopes and fears, strengthening in bravado you in Pneum, Primirp , force of recovery, or Anahata. These angels are capable of bringing the free out of the usually waiting to be paid. These angels are capable of the tautness of any very, very strong dream.

Demons also consume themes in dreams.
The position the body goes through when gaining the writs of wisdom is indicative of leaving the Spirit wrapped in the energy-electronic-physiological-system open for learning from the Echo-sphere, Etka-sphere, Ogle-Sphere, Aestraeusssium, or other area, such as Heaven. I say, Demonstrator doesn't agree, with this being an example of active memory.

The Ancient-most Angels

Chap.32
1070+41=1110
Remaining count 41.
This is:
The gurgles of wisdom
At the end of every statement is statement about this book that I have included despite Demonstrator telling this story.

1.The desired is ignored when it is not read. Unsympathetic genius...cruel was the season and the winter was hard for the hard-pressed who tolerated it at large. Long were the streets, the streets that you crawl. Hard was your effort.Reading took place mnemonically later. valsyalvya-angel of this effect:effort, an angel who is small about physics, but is a Creator of Storms…this one, angel, is all involved in the effort.

An immense attempt is made at having a Universe…because I know that it will be alright in that Earth is another universe.
2.Serious pays solution...but why pay anything at all. If not of the nakromokon then why your religion. Religion is good...the reason chimpanzee were supposed to be sacrificial by Roman, killed each one to a meaning, ere they were considered immature in behavior we don't need amongst men... i found this story someplace in a lesser state of conciousness or sold it as if I was dreaming it. And the first kreator wacked a book into my head to suggest a repeat though reincarnation, metempsychosis or the worship of waste. dispercola-angel of past rich, solves all residing past issues; shows His age, a distinctive one for nostalgia…

But the Universe, Stars, Beings, judges, Demons and angels…points are too old for a Universe and they have to make do. Origin is more complex than we have

the chance to give for it.
3.Balance the touch of senses. The rook of remembering is the call of touch of mention. Truth is the construction of things.remander-angel of the immediate right, rights to do things are His specialty, an angel of Simple Wonderment The most influential angel of immediate, upraised force…

They decide to make life on Earth, to read this book…they settle for an ape, or rather a scrubby squirrel…it evolves into a Man. Mistake the False Appearance of Evolution for something it is not.
4.False to tone the words; appreciate this falseness, it will have more secrecy..spectre- a. of the future or off the one beyond present, stands by the Way of the future…a ghost of an angel

Wisdom is one form of mnemonic, the entire history of speech interpretation a massive amount of forms of mnemonics. Voicing of the Creator of Man, himself.
5.Honesty has of a self more than it rests; it goes into a body more.demonstrator- a. of this reading in writing, a Demonstrator .. Demonstrator is like an insect ghost, batting around constantly, assigning this or that; He is really admirable, if it is all the same. Demonstrator pours out things, by their applied principle, to what are their constituents…

You tell this tale, but what am I’I’”I”(I)[I]{I} supposed to do about it? Wander off, and get lost.
6.Honesty much prevails in freeing solutions.6mozumias angel against distraction, very peaceful angel. The last reckoner…

That is the whole tail, a moronically and inanely simple fragment compared to how monumental it truly is. Suspense of voice, only to be compared to recording.
7(1077)…. Honesty makes of clarity in sanity it's upper limit in prevalence.7hurcheria
of heaving and heaviness or is secret beyond that, an angel of effort, the memorization of sounds of effort or exclamation is it’s forte’ Hurcheria lives in a veil of illusions, so you will want physically nagging memories to pile up, before meeting Him…

There must be some way to preserve things. Experience will tell.
8.Freedom is not reflection but instead, a staining.paragong-the Angel whoso saves the most exotic and extraordinary…stunning is the witness and appeal of Paragong

Man strives to have things as they please. Wilderness.
9.Freedom is for liberty but not so serious as to kill the patience.59sakrent the business-like angel, Going about the usual brings Him around…

Much can be done with leisure and mnemonics (the making of lists to benefit the memory) Try but try for having Was Of Some Nature.
10.Freedom is an old saw, and may have no self, liberty no trust, but braveness would have this freedom.harporata the clown angel of riches, known to save many unique specimens, there is such as a clown angel…

The bindings of our lives sometimes deserve re-defining. Be-wilded.
11.Freedom is courage over the hypocrisy in truth.halthotha the imitator of god angel, A bitter, opalescent white, soprano angel, the end invention is fighting as to what are our definitions of invention…an honest angel

The richness of our lives is brought about by freedom. Freedom is uncovered.
12.Freedom has less tension than sanity, it is glued less together.tizhi-tiu a. of unclear, vague,compromising This is the First Angel in the Universe. The first Angel ever identified and named.

The first holds through the present. Freedom is covered.
13.Freedom is the sensing out, liberty the working out.13hermapthsao angel of extra clear, a transparent angel, Specializes in the memory of words

Liberty is the long end of it. Freedom is the massive conclusion of many conclusions in minutiae.
14.Sin is the least want in sanity.halmalia angel of long trips, number one in reliance Angel long in effort

Guilt is a powerful tourniquet . Sin.
15.Sanity is to respect what the usual resting are to collection.15lulrespendtha angel of glows, refuses to conform, Angel of a comforting glow

Rest there they do; by Earth. Sanity is held in respect.
16.Sanity is not the gleam of the rich, only the gleam of the want or the work.16augmentha angel of angles, goes every challenge in salvation, deals with filing angels by their distractions, which are as alike to their definitions…

Mnemonics is the key to unlocking what in exercise we find in life. Talking about gleams of sanity.

17.Sanity is the defining to have perspective and much later perception.17barelchireroptawa angel of heavy disregard, tries to pull the limit of salvation, a Medieval Angel

To read this book is to improve upon the optic. Suspense has many meanings.
18.Sanity is not the money to buy the witness or the witness to spend but sanity is considered less than freedom because it is not.1088 Azathotha angel of time being worn, a sarcastic angel; oh, the praises this angel can reap in, if quoted vocally

To read this book is to improve the mind. Lives have added up to wisdom.
19.For sanity to be clever it has to originate from risk.19sarchryppe, sarstripa angel of humor, an early Angel

To read this book is to improve upon the humor. Sanity is clever, at least at clever as a turning off.
20.There is no sanity more honestly than honesty without being sacrificed sanity.20melhippothyne angel of customs, stops those who lug through themes, enjoys sticking to routines and would appreciate it if you would too…

To read this book is to improve upon the honesty. Too get Too Fat may be a quality of the Universe.
21.Freedom is trusted to hold genuineness together more than honesty or bravado.1saradarvastarfa angel of survival triggers, number one in emergencies, quite a thriller

This book constitutes a part of the Universe. It is glued together beyond a seam.
22.Seriousness begets respect.2acclamator angel of release, familiar one; of the Memories in Recognizance, I do praise upon Acclamator, one of the letting go

This book has serious things about the universe. Reflections upon Hera.
23.Liberty challenges the stable, often bringing a lesser stability.3orijelustov angel of delights, memorable one, instinctual one

Man is a stable animal. Life is made of elements.
24.Freedom is for liberty and youth with charity a clarity of freedom and liberty, bringing to the fooling charitable youth.4belrimphage angel of science the crude, offers hope, contemplation of most complex in the mundane…

Mnemonics is for the aging. Patient is immediate life and it dies from therapy.
25.Brevity is not first, braveness is. Lost braveness.5examator angel of

revealing, very exact law drives this one, if you concentrate very hard and very long, you know this angel: Examotor, angel of the wear of the Tough upon Nothing, helps people pass lessons

Man will take care of this book, the Sva talat the Book of Trochia. A very old patience constitutes bravado-innuendo.
26.The power of recognition is the want in faith of hope in love itself; it is the gleam of the law.6lusidis angel of want, works with suggestion, bound around an immediate desire

Recognition is a minute form of memory, or of the Mimicries. Hope and love shines from behind all in any mention of the First Creation.
27.The gleam of the law decides the power of the interpreter, forever.7isidis a. of terrible boredom, He works to contact people who are lost, of a vast temperament .

A squirrel is the beginning of the reading of the Book of Trochia. The Law is of Earth, not Yet Of Space.
28.One small space is judgement, one vast space the judged.8adara angel of infants, a small angel, gain says preciousness of youth

All of richness is but judgement. The Mountain of the Question is yet to be climbed.
29.The brilliant of all the Universe knows they must be prepared to be a reader. Keep trying.9expionsa angel of waiting, has a tremendous temper, will always be there, it is rumored

The reading of this massive tract is slow. The brilliance fades into Hell.
30.Variety made merciless multiplicity and brought freedom to restriction. You have to memorize every list in this book to get anything out of this life that is put in it Recognition is put through that saying, as a lot of stuff is put through recognition…this is a truly mysterious angel isideuce angel of two weapons, a. of vine-tendrils 1100, a. Of Ego-onic facility

Plenty of things are being done for this book. One Mind, One Incarnation, the many-armed Gost, has roots.
31.Mystery is estranged, stranded, stained but not secrecy 11velgramotr angel of surfaces, takes care of the dead, restrains worries

Plenty of actions are being done for this book. Secrecy may be a hidden element

of the First Creation.
32.Integrity is not sanity … the govt is comparing your brain to an egg, and you are fully to blame for not making this egg12neylabyte angel of incarnate secrets, makes enough mystery so that people dream when asleep; makes for all incarnate secrets, including “Mesmer”ism. Maybe male, maybe female. Instantly arms people, very young people

Plenty of successions are being done for this book, and their succeeding will be provided some firm and stable connection despite wholly anything to do with this book. A time came to speak of Echo Aeon.
33.Validity, integrity and temerity are all you need but then you get necessity. oubtagon angel of political mercy, number one spectacle of purgatory…uses device of its smallness

There was need for this book. Science will reveal the First Creation.
34.Preciousness and selection are the last to be gathered13cosmotaj angel of spreading, massive sympathy can be had by reciting this one’s name, deals with realms

Man is no ape.Evolution is more precious than definitions.
35.The fineness of carriage risks awkwardness in the slant brought to perception concerning whether reading is moving. The use of wisdom as a word is likened to picking up miniscule parts 14aliotype an. of due warning and ang. Of exercise Mostly female in Nature.Spanner of the Soul.

Flying, crawling and climbing are some of the ways to explore Earth. The passage-machine may be the ultimate machine.
36.Comparison of wait brings difference in wisdom haha15obresias angel of elaboration of the simple, an explainer, cannot keep itself contained

The Earth is vast, but earth is not this book. Radiance and it’s breath, tides, bring thunder and lightning.
37.Waiting may allow a difference; the difference is known as time_sense; time-sense is of the fail_sense ...the one is to gather origins within selecting in that sense that makes less sense 16dicterna angel to dominate reference versus emergency, prized among victims, a very Important Angel

This book tells, in some way, namely primarily more importantly through lists, about the Creation of Earth. Waiting can be had.
38.The befuddler is not the bedazzler17psioppe angel of hope and no love,

dangerous angel, a speedy angel

The energy will return the universe, Universe. Word definition is a thing of challenge.
39.Wisdom is the milk of need; the road of the teeth of envy and thus chewing makes the arc of weather of change 18teleminterme angel of communication, can tend to sensory delusion ‘I wish She was more Clear about what is to be done with this book’, Understanderer

This book is to be kept around. Wisdoms must be tried for.
40.Fashion is a pain. So is impact, division and puncture. Cassiopeia-of acquiring ruse, traditional astronomical angel Another female angel. A tactical angel

To your memory, freedom shall manifest. The artificial is already out of date.
41.Fashion is a pain that cannot sustain the change of a Universe. Most fashion is taken care as quickly as possible. Lusaj, angel of denominating(I bet you never heard of that?); looks for hard to cure subjects…a categorizing sight to behold

Having a Universe consists of knowing what constitutes a universe. Trial was a part of error and at least this phrase risks extinction.

Fundamentally, the BoT explores the Creation of Life, just not the Creation of Biological life…I hope that the idea of certain organic molecules being formed as part of the subatomic plants of the First Creator of the Universe is conveyed.

Isitipraise to that final list, a list of angels wise phrases…would the first creator of creation of the Universe so accept my plea-folding. Fold I isitipraise. Listmaking like mountain climbing is the religious practice of try and try again until you have it right

I looked to Demonstrator and then away, and from him no more, and then I looked to a cat on the floor: the cat was thinking,”Why must you do that with your mind?”, I know it was because it said so…I replied, ’I do it because I will end up with a higher state of ego-death’ and Demonstrator chimed in,”No, you do it because you are told to”.

I put up all these words of 1111 or 1231 Gods-Names here in lists for the finding of, but I can’t help wondering if the point of it should be ‘tabu-forbidden’.

The fantastic thing is the human brain, it has an estimated 1 terabyte to 2 and a half petabytes in memory, and it's ability with rote is surprisingly excellent to define things a second time, but there is also meaningful learning, and associative and active learning, like Merem, in telling tales, or NajaShaka, tsroforst, in surviving abandonment in hospitals…the most realistic association for memory, is, sadly, however, shared blame, not rote…forstof allows me to clearly see this.
The fantastic thing is human beings …look at what they have for purified, pure genuine ujtru force of study they have studied through incarnations and wore right through at Sakr101 and were reincarnated, split off from earlier memories in Alma, Alta or olmo olto
Before all of that inspiration is used, it helps to say human beings went on, fulfilled in the fruitfulness of the harshness of nature.
They couldn't do what flanalf did, rename Himself 137 times these names are given here: flaxalf, chartrach, krastsark, flatalf, vanav, fataf, flathalf, churdruch, chirdrich, chadach, kraxark, krystsyrk,12 ,fitif, voonoov, chourdrouch, sourdrous, fleeteelf, flouthoulf, kraastsaark, flinilf, flunulf, flonolf, fomof, foomoof, funuf, ssordross, fleeneelf, feemeef, flowmwolf, shurtrush, kurtruk, kortrok,32, vaanaav, prastsarp, trapsart, footoof, fyutuyf (fyootough), vayiniyav, flayamananamayalf, krostsork, kreteketerk, futuf, krotork, filmlif, vyieneiyv, flayalf, fladalf, flabalf, flibrilf, flibilf, fladsralf, dsraffarsd, fietief, flaothaolf, kourtrouk, fatalataf, fetalatif, vemanalalanamev, flefelf, flagalf, flugulf, flogolf,62, flougoulf, sardras, flahalf, flopolf, flujulf, flojolf, saardraas, vayithiyav, vaythyav, faathaaf, vonov,73, vomitimov, mitim, mutum, muatuam, muajuam, maathaam, murthrum, melem, meleelem, metitem, vitiv, rastsard, sortros, viynyiv, flokolf, pusimathamisup, chaytrakartyach, chatteracharettach,91, kucheracharechuk, valtav, shartrash, shaftrash, hogloh, hothoh, hogroh, honotatonoh, flawmwalf,100, talmlat, waltmtlaw, warthogothraw, fetusutef, fetalposhtoplatef, flowerewolf, werew(a prize name), verthrev, flakalf, flalalf, flalalalf, fraaloolaarf, flamalf, flapalf, flepelf, flagalf, flikilf, fliquilf, flaralf,119, fortraartrof, vooltloov, evolova', faamaaf, zoomooz, zoordooz, zoolgthlooz, flooroolf, kritirk,128, chshirtrishch, vanasmemerememsanav, vanasnmemnsanav, fluuzuulf, flailblailf, vuljluv, flaxralf, tulblut, waltlaw, =137
This has proved useful in taking care of any extensor we zoology may have, any tree, any vine, any whale, any crow and anything like a centipede just mowing about…as such flanalf is both a deep and shallowing source of mystery.

‘“Why must you do that with your mind’”-my reply would be various things, alma of the 9 FFC has divided me off that way from my incarnation-sequenced lineage…azaza must have made a pact with me, and I have worn through things with rote, so that my mind made of this stack: memory, rote, comprehension, prerogatives, individuation, duality and then in that duality duplicity, to which whit double-dealing has provided me with that memory - remainder…or I have had ego-deaths in Scapula, self-destruction, the fifteenth one of the beings Wurgonna…this shows how strong my impression of a cat-ghost are with me writing about it so much.

The story of Trochia the First Book of goes, without exception, through a long bore mentioning the points of Sleep in Seven Hundred and Eighty Nine Words through to a collection of forces, wakes, torments of mimes, Philosifistatics of Mimicry, or Memories with memeri defined as the quality memory(this one, Merem, tells tales; it’s tale of this is that names and definology are simply repositioned so that 1231 equaleth 1111)and these play out or conclude, I mean specifically, at Two Gods, some Beings(Wurgonna) and Some Judges(Amalamachagra)…what happens after these 46(Forty-Six): the Book goes on with three for one with the Angels who have Bonded by Pacts with the Demons(who Dwell Below) and karmas (Imps) in an area of the Book where there is a Creation of Earth. After that the Ancientmost Angels show their wisdom.

The story of Trochia is patent by eye, and by digital as well as paper(analog)write, and patent as well by rote, containing 789 points, 137 forces, 2 Gods, 22 Beings, 22 Judges, 180 names in the Creation of Earth, and 41 ‘Gurgles’ of Wisdom, and has upon the ability to raise rote for memorization, and has upon the treatise the ability to bring a whole comprehension of the Least Bang’s glowering topmost Aurae to the heavens and to survey it’s belonging to to a mini-fancy of All Power, all property of you the reader, and you are expected to haunt this with maturity, both neither taking lenience to distribute rote, or at least distributing it in an associative complex of the dictates of needful Firifian suggestion and an active party to imagined death, unconscious imagination, automatic authority, memory, language, however complex and in uniqueness, by your own patent.
On repeated readings, you will learn, it is not for some cat-ghost.

And now

You have memory to use to confront this volume. Let the words slowly boil,

bake and crumble under recognizance, scraping at the brain-mind as they attempt to gain memory. God knows when Memeri is gained, that is why it is Memeri.
